Overview

We are a commercial-stage diagnostics company committed to reducing healthcare costs and improving patient care through the provision of innovative tests within established markets. Our initial focus is on blood grouping and donor disease screening, which is commonly referred to as transfusion diagnostics. Blood grouping involves specific procedures performed at donor or patient testing laboratories to characterize blood, which includes antigen typing and antibody detection. Disease screening involves the screening of donor blood for unwanted pathogens using two different methods, a serological approach (testing for specific antigens or antibodies) and a molecular approach (testing for DNA or RNA). We believe that MosaiQ, our proprietary technology platform, may also have application beyond transfusion diagnostics in the larger clinical diagnostics market, where testing currently performed using separate immunoassay and molecular testing techniques for a single diagnosis could be combined on one testing technology permitting multiple tests simultaneously with a simplified workflow.

We operate in the in vitro diagnostic space, which we project to reach \$40 billion by 2023, and have designed MosaiQ to initially target the \$3.4 billion global transfusion diagnostics market and the \$750 million plasma diagnostics market. We have over 35 years of experience developing, manufacturing and commercializing conventional reagent products used for blood grouping within the global transfusion diagnostics market. We are developing MosaiQ to better address the comprehensive needs of this large and established market. MosaiQ will initially comprise two separate microarrays, one for immunohematology (blood grouping), or IH, and one for serological disease screening, or SDS, and a high-throughput instrument. We are also developing a third microarray for molecular disease screening. We believe MosaiQ has the potential to transform transfusion diagnostics, significantly reducing the cost of blood grouping in the donor and patient testing environments, while improving patient outcomes.

We have designed MosaiQ to offer a breadth of diagnostic tests that is unmatched by existing commercially available transfusion diagnostic instrument platforms. Time to result for MosaiQ is expected to be significantly quicker than existing methods for extended antigen typing and antibody detection and is expected to be equivalent to the time to result for current instrument platforms performing basic antigen typing. In particular, the MosaiQ instrument has been designed to process up to 3,000 microarrays per day (assuming three eight-hour shifts), giving a capacity to test up to 1,500 donor samples (utilizing both IH and SDS microarrays) or 3,000 patient samples (utilizing IH microarrays only). Each MosaiQ microarray can host up to 132 probes, and the MosaiQ instrument can deliver test results every 24 seconds after the instrument is fully loaded.

We believe that customer adoption of MosaiQ will lead to improved patient outcomes through better and easier matching of donor and patient blood, given cost-effective extended antigen typing offered by MosaiQ. Improved patient outcomes using MosaiQ include the potential for reduced incidence of alloimmunization, where the patient develops antibodies to foreign antigens introduced to the body through transfused blood. Cost savings and efficiencies should also be available to customers that adopt MosaiQ, as a result of:

- consolidation of multiple instrument platforms in donor testing laboratories;
- automation, which will help to address shortages of skilled technicians;
- better workflow, which will lead to a better cost position, addressing budget constraints;
- comprehensive characterization of donor or patient blood, eliminating the need for routine manual testing typically undertaken by skilled technicians; and
- higher throughput and productivity per square meter.

We have designed MosaiQ to match the existing performance of automated platforms used by donor testing laboratories for serological disease screening. We also believe the incorporation of molecular disease screening on MosaiQ will offer considerable advantages over existing approaches in use by donor testing laboratories, delivering operational cost savings and a reduced time to result, while also eliminating the need to pool samples.

Our initial aim is to provide donor testing laboratories with a single instrument platform to be utilized for blood grouping and, if applicable, both serological and molecular disease screening for donated red blood cells and plasma. We expect there to be two blood grouping microarrays, one for the donor testing market and one for the patient testing market. We refer to the blood grouping microarrays as the MosaiQ IH Microarray. We refer to the serological disease screening microarrays as the MosaiQ SDS Microarray. The initial MosaiQ SDS Microarray will comprise assays to detect CMV and Syphilis. We expect to follow our initial MosaiQ SDS Microarray launch with the launch of a range of additional expanded MosaiQ SDS Microarrays incorporating all remaining mandated serological disease screening assays, depending upon the final application for the product. Based on historical annual blood donations collected by our key target donor testing customers, we estimate that the potential market for MosaiQ microarrays (for blood grouping, serological disease screening and molecular disease screening) should exceed 100 million microarrays per annum following receipt of applicable regulatory clearances and approvals for MosaiQ. Our current annual production capacity for microarrays is approximately 30 million, and we have the option to double this capacity by installing an additional production line, which we expect would take approximately 15 months.

We also believe that MosaiQ may have the potential for use beyond transfusion diagnostics in the larger clinical diagnostics market, and are evaluating the potential for our technology as a platform for diagnosis and monitoring of other disease states. We have identified opportunities for future partnership and development in relation to disease states for which a broad array of tests is required using multiple testing modalities for a single diagnosis or for ongoing therapy monitoring.

For example, in response to the COVID-19 global pandemic, in May 2020, we completed development of a microarray-based SARS-CoV-2 antibody test for use on the MosaiQ platform. The SARS-CoV-2 antibody test is designed as a serological disease screen specific to COVID-19 antibody detection. The assay detects the Immunoglobulin G (IgG) and Immunoglobulin M (IgM) antibodies directed at SARS-CoV-2. We refer to the SARS-CoV-2 antibody test as the MosaiQ COVID-19 Microarray. In addition, our near-term focus is on the potential for developing MosaiQ for use with commercial plasma for fractionation, and we are also considering other possible development opportunities for the mid-term, including infectious diseases, allergies, autoimmune diseases, reproduction and women's health and transplant medicine.

We have a proven track record and significant expertise in product development, manufacturing and quality assurance, tailored to the highly regulated transfusion diagnostics market. We currently derive revenue from a portfolio of products used for blood grouping, as well as whole blood controls used daily for quality assurance testing of third-party blood grouping instruments. We have introduced a range of U.S. Food and Drug Administration, or FDA, licensed products in the United States under the Quotient brand, which we sell directly to donor testing laboratories, hospitals and independent patient testing laboratories. We also develop, manufacture and sell conventional reagent products to original equipment manufacturers, or OEMs, such as Ortho-Clinical Diagnostics, Inc. (or Ortho), Bio-Rad Laboratories, Inc., and Grifols S.A. In July and December 2019, the FDA licensed a range of conventional reagent products developed and manufactured by us for use on instrument platforms commercialized by Ortho.

Recent Developments

MosaiQ Update

In April 2019, we received CE Marking approval of our initial MosaiQ IH Microarray in Europe. Following the CE mark for our initial MosaiQ IH Microarray, we have commenced and completed pre-market launch, combined with support to customers, or hypercare, with four selected customers.

In addition, in April 2019, we completed field trials for the initial MosaiQ SDS Microarray in Europe and published performance data. In these field trials, in excess of 4,600 samples were tested for Syphilis and for CMV. A summary of the data is set out below:

<u>PATHOGEN</u>	<u>SENSITIVITY %</u>	<u>SPECIFICITY %</u>
Syphilis	100%	99.6%
CMV	98.7%	97.8%

In October 2019, we published preliminary performance data for the initial MosaiQ SDS Microarray after completion of our U.S. field trials. In these field trials, in excess of 5,000 samples were tested for Syphilis and for CMV. A summary of the preliminary data is set out below:

<u>PATHOGEN</u>	<u>SENSITIVITY %</u>	<u>SPECIFICITY %</u>
Syphilis	99.4%	99.7%
CMV	99.7%	94.8%

In addition, in October 2019, we reported verification and validation, or V&V, concordance data for our expanded MosaiQ IH Microarray. 723 samples were tested in the antigen-typing study and the results compared with predicate technologies. A summary of the V&V study head-to-head data is set out below:

<u>BLOOD GROUP ANTIGEN</u>	<u>A</u>	<u>B</u>	<u>D</u>	<u>C</u>	<u>c</u>	<u>E</u>	<u>e</u>	<u>K</u>	<u>Cw</u>
Concordance	99.6%	100%	99.3%	99.4%	99.7%	100%	100%	100%	100%

<u>BLOOD GROUP ANTIGEN</u>	<u>k</u>	<u>Kpa</u>	<u>Fya</u>	<u>Fyb</u>	<u>Jka</u>	<u>Jkb</u>	<u>N</u>	<u>S</u>	<u>Leb</u>
Concordance	98.9%	99.3%	98.8%	99.7%	98.6%	98.9%	100%	97.7%	98.1%

In December 2019, we announced concordance data for the MosaiQ MDS Microarray. We undertook a benchmarking study to assess the performance of the MosaiQ MDS Microarray against the Roche Cobas system, or Cobas. In this study, the sensitivity of MosaiQ MDS was 95% for HIV, HBV and HCV positive samples, and the specificity was 100%.

In February 2020, we received CE Mark approval for the initial MosaiQ SDS Microarray. In addition, in February 2020, we announced concordance data for the expanded MosaiQ SDS Microarray. We undertook a benchmarking study to assess the performance of the expanded MosaiQ SDS Microarray against Cobas. In collaboration with an external laboratory, 60 HIV1/2, 30 HBV, and 30 HCV known seropositive samples were tested alongside 157 known seronegative samples. A summary of the data is set out below:

<u>Target</u>	<u>Platform</u>	<u>Sensitivity %</u>	<u>Specificity %</u>
HIV-1	Cobas	100	100
	MosaiQ	100	100
HIV-2	Cobas	100	100

HBV	Cobas	100	99.4
	MosaiQ	100	99.4
HCV	Cobas	100	100
	MosaiQ	100	100

We have initiated the pre-market launch of the initial MosaiQ SDS Microarray, combined with hypercare, into the European and U.S. donor testing markets (with the MosaiQ Instrument). We plan to follow this initial launch with: (i) an expanded MosaiQ IH Microarray comprising an expanded antigen typing panel for the donor testing market; (ii) a second expanded MosaiQ IH Microarray comprising the extended antigen typing panel and an expanded antibody detection panel for the patient testing market; and (iii) an expanded MosaiQ SDS Microarray incorporating assays for the detection of CMV; Syphilis; Hepatitis B, or HBV, comprising HBV Surface Antigen and HBV Core Antibody; Hepatitis C, or HCV; Human Immunodeficiency Virus, or HIV, comprising HIV Type 1 and HIV Type 2; Human T-Lymphotropic Antibodies, or HTLV; and Chagas disease.

We commenced field trials for the expanded MosaiQ IH Microarray at three locations in Europe in the first quarter of 2020. These trials were suspended due to the COVID-19 pandemic in March 2020, but containment measures and restrictions were eased for two trial locations in May 2020 and for the third trial location in August 2020, allowing work to recommence in all three locations. Further, these trials have recommenced from the point at which they were suspended with no requirement to repeat any of the work already performed. The results of these trials are expected to be available in October 2020 and CE Mark submission for the expanded MosaiQ IH Microarray is expected by the end of the fourth quarter of 2020. The commencement of field trials in the United States for the expanded MosaiQ IH Microarray has also been postponed due to the COVID-19 pandemic. These trials will commence as soon as the circumstances permit, which we expect will be towards the end of 2020 or the beginning of 2021, with regulatory submissions expected in the first half of 2021. The European regulatory submission for the expanded MosaiQ SDS Microarray is expected in the second half of 2021.

In addition, in response to the COVID-19 pandemic, in May 2020, we completed development of the MosaiQ COVID-19 Microarray for use on the MosaiQ platform. We signed the first commercial contract for the sale of the MosaiQ COVID-19 Microarray in May 2020, and we have subsequently entered into nine additional contracts with customers in Europe and the United States, including Bloodworks Northwest. We are also developing a semi-quantitative MosaiQ COVID-19 Microarray.

- We expect to file for European and U.S. regulatory approval for a MosaiQ IH Microarray optimized for the patient testing market, or the MosaiQ IH3 Microarray, during the second half of 2021 and the first half of 2022, respectively.

Additional Development Opportunities for MosaiQ

We are also evaluating a number of other development opportunities for our MosaiQ platform in the larger clinical diagnostics market. These opportunities include developing MosaiQ for use with commercial plasma for fractionation, and immunoassay, or IA, and molecular, MDx, tests for central labs. IA and MDx tests are performed remotely from the point of patient contact. A blood sample is analyzed for the presence of certain markers and the results of those tests can be used by physicians to determine treatment plans for patients. We expect to make regulatory submissions in Europe and the United States for a MosaiQ IA Microarray in 2022.

We also plan to develop custom-designed microarrays for individual customers for use with the MosaiQ platform. For example, we recently entered into a framework agreement with U.S.-based diagnostics laboratory to explore the development of a series of customized microarrays.

Termination of Ortho Arbitration and New Distributor Relationship with Ortho

We previously were involved in an arbitration dispute with Ortho regarding our termination of our former distribution and supply agreement with Ortho, which related to the commercialization of certain MosaiQ products. On September 4, 2020, we and Ortho entered into a binding letter agreement, or the Letter Agreement, that confirmed the termination of the former distribution and supply agreement and related contracts, resolved our disputes with respect to the former distribution agreement and ended our arbitration with Ortho, and established a new distributor relationship with Ortho focused solely on patient transfusion diagnostics.

Under the Letter Agreement, we will develop the MosaiQ IH3 Microarray, which will be optimized for the patient transfusion market. We will sell this microarray along with instruments and consumables to Ortho for distribution in Europe and in the United States. In addition to payments for the products we will supply, we will also be entitled to up to \$67.5 million in milestone payments. We received the first, nonrefundable milestone payment of \$7.5 million on September 4, 2020. The remaining milestone payments are due upon the achievement of certain regulatory and commercial sales benchmarks. Ortho's rights to the MosaiQ IH3 Microarray in the European and U.S. patient transfusion markets are for ten-year terms. Ortho's rights are exclusive so long as Ortho satisfies certain minimum purchase requirements, which increase over the first five years. Under the Letter Agreement, Ortho has no rights to applications of our MosaiQ technology outside of patient transfusion diagnostics. We retain the right to distribute, market and sell the immunohematology Microarrays for use in blood donor testing worldwide and in the patient testing market outside of Europe and the United States.

For additional information about the terms of the Letter Agreement, see our Current Report on Form 8-K filed with the SEC on September 8, 2020, and incorporated by reference herein.

Short-Term Liquidity

The audited consolidated financial statements appearing in our FY 2020 10-K were prepared assuming we would continue as a going concern. In the notes to these financial statements, we disclosed that (i) we had incurred net losses and negative cash flows from operations in each year since we had commenced operations in 2007, (ii) we had an accumulated deficit of \$483.4 million as of March 31, 2020, and (iii) as of March 31, 2020, we had available cash holdings and short-term investments of \$120.8 million. Our expenditure plans over the next 12 months and the generation of lower than expected sales could result in an impact on the liquidity and financial position of the business such that the net cash outflows over the next 12 months could exceed our existing available cash and short-term investment balances, raising substantial doubt about our ability to continue as a going concern.

In its audit report related to these financial statements, our independent registered public accounting firm, Ernst & Young LLP, made reference to our disclosure regarding substantial doubt about our ability to continue as a going concern. We expect to fund our operations in the near-term, including the ongoing development of MosaiQ through successful field trial completion, achievement of required regulatory authorizations and commercialization, from a combination of funding sources. These expected funding sources include the use of existing available cash and short-term investment balances, cash generated through ongoing sales of the MosaiQ COVID-19 Microarray, and the issuance of new equity (including in this offering) or debt.

RISK FACTORS

Investing in our ordinary shares involves a high degree of risk. Before buying any of our ordinary shares, you should carefully consider the risks described below, together with all of the other information included in this prospectus supplement and the accompanying prospectus, together with the information incorporated by reference herein and therein, and any free writing prospectus, including the risks described under the heading “Risk Factors” in our FY 2020 10-K. Any of these risks could materially adversely affect our business, financial condition and results of operations. As a result, the market price of our ordinary shares could decline, and you could lose all or part of your investment. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial may also materially and adversely affect our business operations and could result in complete or partial loss of your investment. Certain statements below are forward-looking statements. See the information included under the heading “Forward-Looking Statements.”

Risks Related to Our Business, Industry and Future Plans

Our commercialization plan for MosaiQ in the patient transfusion diagnostics market depends on our distributor relationship with Ortho, and we may enter into additional distribution or sales arrangements in the future that may subject us to similar risks.

We will rely on Ortho to commercialize MosaiQ in the highly fragmented patient transfusion diagnostics market in Europe and the United States. Under our distributor relationship with Ortho, we will develop the MosaiQ IH3 Microarray for the patient transfusion market, and Ortho will have the right to distribute, market and sell the MosaiQ IH3 Microarray in Europe and in the United States, solely for use in testing the immuno-hematological profile of the blood of medical patients in the course of their care or treatment. Ortho may not commit sufficient resources to this commercialization arrangement, as MosaiQ may compete for time, attention and resources with Ortho’s internal programs, or Ortho otherwise may not perform its obligations as expected. In addition, Ortho is both a customer and a competitor of our conventional reagent business. If Ortho is unable, or fails, to perform its obligations, there can be no assurance that we will be able to enter into commercialization relationships with other partners with sufficient existing global sales and support infrastructures necessary to successfully commercialize MosaiQ in the patient transfusion diagnostics market in these territories. Any of these risks could delay the commercialization of MosaiQ in the patient transfusion diagnostics market, result in high costs to us or otherwise materially harm our business and adversely affect our future revenues.

We may also enter into additional distribution or sales arrangements to commercialize MosaiQ in other markets. To the extent that we enter into other distribution or sales arrangements, our product revenue is likely to be lower than if we directly market or sell MosaiQ. In addition, any revenue we receive will depend in whole or in part upon the efforts of third parties, which may not be successful and will generally not be within our control. If we are not successful in commercializing MosaiQ through collaborations with one or more third parties, our future product revenue will suffer and we may incur significant additional losses.

Risks Related to this Offering and our Ordinary Shares

If securities analysts do not continue to cover our ordinary shares or publish unfavorable research or reports about our business, this may have a negative impact on the market price of our ordinary shares.

The trading market for our ordinary shares depends on the research and reports that securities analysts publish about our business and our company. We do not have any control over these analysts. There is no guarantee that securities analysts will continue to cover our ordinary shares. If securities analysts do not cover our ordinary shares, the lack of research coverage may adversely affect the market price of our ordinary shares. If our shares are the subject of an unfavorable report, our share price and trading volume would likely decline. If one or more of these analysts ceases to cover our company or fails to publish regular reports on our company, we could lose visibility in the financial markets, which could cause our share price or trading volume to decline.

The price of our ordinary shares is likely to be volatile, and purchasers of our ordinary shares could incur substantial losses.

Like other emerging life sciences companies, the market price of our ordinary shares is likely to be volatile. The factors below may also have a material adverse effect on the market price of our ordinary shares:

- fluctuations in our results of operations;
- delays in the planned commercialization of MosaiQ;
- speed and timing of adoption of MosaiQ by key target customers;
- our ability to enter new markets;
- negative publicity;
- changes in securities or industry analyst recommendations regarding our company, the sectors in which we operate, the securities market generally, conditions in the financial markets and the perception of our ability to raise additional funding;
- regulatory developments affecting MosaiQ or our industry, including announcement of new adverse regulatory decisions affecting our industry or MosaiQ;
- announcements of studies and reports relating to our products, including MosaiQ, or those of our competitors;
- changes in economic performance or market valuations of our competitors;
- actual or anticipated fluctuations in our annual and quarterly financial results;
- conditions in the industries in which we operate;
- announcements by us or our competitors of new products, acquisitions, strategic relations, joint ventures or capital commitments;
- additions to or departures of our key executives and employees;
- fluctuations of exchange rates;
- release or expiry of lock-up or other transfer restrictions on our outstanding ordinary shares subject to such restrictions; and
- sales or perceived sales of additional ordinary shares.

In addition, the securities of life sciences companies have in recent years experienced significant volatility. The volatility of the securities of life sciences companies often does not relate to the operating performance of those companies. As we operate in a single industry, we are especially vulnerable to these factors to the extent that they affect our industry or our products, or to a lesser extent our markets. In addition, more recently, the stock market has experienced significant price and volume fluctuations as a result of the COVID-19 pandemic. This volatility has had a significant impact on the market price of securities issued by many companies across many industries. In the past, securities class action litigation has often been initiated against companies following periods of volatility in their stock price. This type of litigation could result in substantial costs and divert our management's attention and resources, and could also require us to make substantial payments to satisfy judgments or to settle litigation.

You will incur immediate and substantial dilution as a result of this offering.

Since the price per share of the ordinary shares being offered is substantially higher than the net tangible book value per share of our ordinary shares, you will suffer immediate and substantial dilution in the net tangible book value of the ordinary shares you purchase in this offering. Based on the public offering price of \$4.25 per share, if you purchase ordinary shares in this offering, you will suffer immediate dilution of \$3.85 per share with respect to the net tangible book value of the ordinary shares. See "Dilution."

Substantial future sales of our ordinary shares in the public market, or the perception that these sales could occur, could cause the price of our ordinary shares to decline, irrespective of the underlying performance of our business.

Additional sales of our ordinary shares in the public market after this offering, and in particular sales by our directors, executive officers and principal shareholders, or the perception that these sales could occur, could cause the market price of our ordinary shares to decline. Approximately 8,660,927 ordinary shares directly or indirectly owned by our executive officers, directors and certain of our other existing shareholders as of September 8, 2020 will be subject to lock-up agreements with the underwriters of this offering that restrict the sale of ordinary shares by those parties for a period of 90 days after the date of this prospectus supplement. However, all of the ordinary shares sold in this offering and the remaining ordinary shares outstanding prior to this offering (which include certain shares that are held by persons that beneficially own more than 5% of our outstanding ordinary shares) will not be subject to lock-up agreements with the underwriters and, except to the extent such shares are held by our affiliates, will be freely tradable without restriction under the Securities Act. To the extent any of these shares are sold into the market, particularly in substantial quantities, the market price of our ordinary shares could decline.

Management will have broad discretion as to the use of the proceeds from this offering, and we may not use the proceeds effectively.

Our management will have broad discretion as to the application of the net proceeds of this offering and could use them for purposes other than those currently contemplated and may not use them effectively. Our shareholders may not agree with the manner in which our management chooses to allocate and spend the net proceeds. Moreover, our management may use the net proceeds for corporate purposes that may not increase our profitability or our market value. See “Use of Proceeds” for a description of our management’s intended use of the proceeds from this offering. The failure by our management to apply these funds effectively could result in financial losses, and those financial losses could have a material adverse effect on our business and cause the price of our ordinary shares to decline. Pending their use, our management may invest the net proceeds from this offering in a manner that does not produce income.

We may need to raise additional capital, which may not be available on favorable terms, if at all, and which may cause dilution to shareholders, restrict our operations or adversely affect our ability to operate our business.

We expect to fund our operations in the near-term, including the ongoing development of MosaiQ through successful field trial completion, achievement of required regulatory authorizations and commercialization, from a combination of funding sources, including with available cash and short-term investment balances, cash generated through sales of our MosaiQ COVID-19 Microarray, and the issuance of new equity (including in this offering) or debt. Our ability to raise additional capital may be significantly affected by general market conditions, the market price of our ordinary shares, our financial condition, uncertainty about the future commercial success of MosaiQ, regulatory developments, the status and scope of our intellectual property, any ongoing arbitration or litigation, our compliance with applicable laws and regulations and other factors, many of which are outside our control. Furthermore, the indenture governing our 12% Senior Secured Notes due 2024, or the Secured Notes, contains limitations on our ability to incur debt and issue preferred and/or disqualified stock. Accordingly, we cannot be certain that we will be able to obtain additional financing on favorable terms or at all. If we are unable to obtain needed financing on acceptable terms, or otherwise, we may not be able to implement our business plan, which could have a material adverse effect on our business, financial condition and results of operations, including a decline in the trading price of our ordinary shares. Any additional equity financings could result in additional dilution to our then existing shareholders. In addition, we may enter into additional financings that restrict our operations or adversely affect our ability to operate our business and, if we issue equity, debt or other securities to raise additional capital or restructure or refinance our existing indebtedness, the new equity, debt or other securities may have rights, preferences and privileges senior to those of our existing shareholders.

We have never paid cash dividends and do not intend to pay cash dividends on our ordinary shares in the foreseeable future.

We have never paid dividends on ordinary shares and do not anticipate paying any cash dividends on our ordinary shares in the foreseeable future. In addition, the indenture governing the Secured Notes contains covenants that limit our ability to pay dividends on our ordinary shares. Under Jersey, Channel Islands law, any payment of dividends would be subject to relevant legislation and our Amended Articles of Association provide that all dividends must be approved by our Board of Directors and, in some cases, our shareholders, and may only be paid from our distributable profits available for the purpose, determined on an unconsolidated basis.

If a United States person is treated as owning at least 10% of our ordinary shares, such United States person may be subject to adverse U.S. federal income tax consequences.

If a United States person is treated as owning (actually or constructively) at least 10% of the value or voting power of our ordinary shares, such U.S. holder will be treated as a “United States shareholder” with respect to each “controlled foreign corporation” in our group (if any). Because our group includes at least one U.S. subsidiary, our non-U.S. subsidiaries and any non-U.S. subsidiaries we were to form or acquire in the future will be treated as controlled foreign corporations. A United States shareholder of a controlled foreign corporation will be required to annually report and include in its U.S. taxable income its *pro rata share of “subpart F income,” “global intangible low-taxed income” and investments in U.S. property by controlled foreign corporations, regardless of whether we make any distributions. An individual that is a United States shareholder with respect to a controlled foreign corporation generally will not be allowed certain tax deductions or foreign tax credits that are available to a United States shareholder that is a domestic corporation. We cannot provide any assurance that we will furnish to any United States shareholder the information required to comply with the reporting and tax-paying obligations discussed above. Failure to comply with such reporting obligations may subject a holder of our ordinary shares that is a United States shareholder to significant monetary penalties and may prevent the statute of limitations with respect to your U.S. federal income tax return for the year for which reporting was due from starting. Holders of our ordinary shares that are United States persons should consult their tax advisors regarding the potential application of these rules to their investment in our ordinary shares.*

Risks Related to Government Regulation

Recent global economic and political conditions could result in significant changes to legislation, government policies, rules and regulations, which may have a material adverse effect on our business.

The impact of recent political and economic developments in the United States, the United Kingdom and Europe, including the legislative and trade policy agenda of President Donald Trump and the United Kingdom’s exit from the European Union, commonly referred to as “Brexit,” are uncertain. These political and economic developments could result in changes to legislation or reformation of government policies, rules and regulations pertaining to the U.S. healthcare system, tax and trade. Such changes could have a significant impact on our business by increasing the cost of doing business, affecting our ability to sell our products and negatively impacting our profitability. In addition, these developments, or continuing uncertainty surrounding these developments, could result in significant financial market volatility, and could also exacerbate, or result in, a slow-down of growth in global, U.S. and other economies, which could have a material adverse effect on our operating performance and the market price of our ordinary shares.

Efforts to repeal and replace the U.S. Patient Protection and Affordable Care Act, or the PPACA, have been ongoing since the 2016 election, but it is unclear if these efforts will be successful. Since January 2017, President Trump has signed two Executive Orders and other directives designed to delay, circumvent or loosen the implementation of certain requirements mandated by the PPACA or otherwise circumvent some of the requirements for health insurance mandated by the PPACA. In addition, as part of the December 2017 Tax Cuts and Jobs Act, the “individual mandate,” which required individuals to purchase insurance, was repealed. On December 18, 2019, the U.S. Court of Appeals for the Fifth Circuit upheld the District Court ruling that the

[Table of Contents](#)

individual mandate was unconstitutional and remanded the case to the District Court to determine whether the remaining provisions of the PPACA are invalid. The PPACA significantly impacts the pharmaceutical and medical device industries and clinical laboratories, and the repeal, replacement or modification of the PPACA, or other legislative or regulatory actions, could meaningfully further change the way healthcare services are delivered and may materially impact aspects of our business. We cannot predict whether future healthcare initiatives will be implemented at the federal or state level or in countries outside of the United States in which we may do business, or the effect any future legislation or regulation will have on us.

Our conventional reagent products are manufactured in Scotland and our MosaiQ instruments and microarrays are manufactured in Germany and Switzerland, respectively. In the United States, President Trump's administration has discussed, and in some cases implemented, changes with respect to certain tax and trade policies, tariffs and other government regulations affecting trade between the United States and other countries. For example, trade relations between the United States and China were, at times, significantly strained during 2019, as both countries imposed increased tariffs on the importation of certain product categories. While it is not possible to predict whether or when any additional changes will occur or what form they may take, the implementation of a border tax, tariff or higher customs duties on our products imported into the United States, or any potential corresponding actions by other countries in which we do business, could negatively impact our financial performance.

Furthermore, on January 31, 2020, the United Kingdom ceased to be a member state of the European Union. As of that date, the United Kingdom entered a transitional period with the European Union, which is expected to continue through December 31, 2020. During this transitional period the United Kingdom retains access to the E.U. single market and customs union and the United Kingdom and the European Union are expected to attempt to negotiate various aspects of their future relationship following the transitional period, including a free trade deal. The long-term effects of Brexit will depend on the agreements or arrangements between the United Kingdom and the European Union, and the extent to which the United Kingdom retains access to the E.U. markets both during and after the transitional period. The longer term economic, legal, political and social framework to be put in place between the United Kingdom and the European Union is unclear at this stage and it is likely to lead to ongoing political and economic uncertainty and periods of exacerbated volatility in both the United Kingdom and in the wider European markets for some time.

Among other impacts, we expect that Brexit will impact our regulatory approval plan for MosaiQ. The European Union is transitioning from the existing European Directive 98/79/EC on in vitro diagnostic medical devices, or the IVDD, to the In Vitro Diagnostic Device Regulation, or the IVDR, which will repeal and replace the IVDD. Unlike the IVDD, which must be implemented into the national laws of the Member States of the European Economic Area, or EEA, the IVDR will be directly applicable in all EEA Member States and is intended to eliminate current differences in the regulation of in vitro diagnostic medical devices among EEA Member States. However, due to Brexit, the United Kingdom will not be subject to the IVDR and will instead introduce its own regulatory framework. As a result, there will be a new conformity marking solely for the United Kingdom and, as of January 1, 2021, any new products will require a U.K. Conformity Assessed, or UKCA, mark, in addition to a CE mark. However, our existing products will be able to rely on CE marks previously obtained during a transition period that will last until June 30, 2023.

While we believe we have developed plans to manage the Brexit-related risks to our business and operations, including in the event that the United Kingdom and the European Union fail to finalize an agreement on the United Kingdom's future relationship with the European Union before the end of the transitional period, it is unknown what the final terms of the relationship will be. If no agreement can be reached before the end of the transitional period there will be a period of considerable uncertainty, particularly in relation to the U.K. financial and banking markets, the regulatory process in Europe and movement of goods and people between the United Kingdom and the European Union. It is also possible that, even if there is an agreement, there will be greater restrictions and transportation delays on imports and exports between the United Kingdom and E.U. countries and increased regulatory complexities, which could result in delays and increased expenses relating to the

regulatory approval of our products. In addition, depending on the terms of the agreement, the United Kingdom could lose the benefits of global trade agreements negotiated by the European Union on behalf of its members, which may result in increased trade barriers which could make our doing business worldwide more difficult. Furthermore, currency exchange rates in the pound sterling and the euro with respect to each other and the U.S. dollar have already been adversely affected by Brexit. Should this foreign exchange volatility continue, it could cause volatility in our financial results.

In addition, on September 27, 2020, the Swiss electorate will vote on a popular initiative to terminate the Agreement on the Free Movement of Persons, or AFMP, with the European Union. Switzerland is not an E.U. member state and the AFMP enables Swiss citizens to work in E.U. countries and E.U. citizens to work in Switzerland. If this initiative is approved, negotiations would begin between the Swiss Federal Council and the European Union to terminate the AFMP and, if these negotiations were to fail, the Swiss Federal Council would be required to unilaterally terminate the AFMP, which would result in several other bilateral agreements, including the Mutual Recognition Agreement, or MRA, between the European Union and Switzerland, automatically ceasing to be applicable. The MRA currently allows manufacturers based in Switzerland to commercially distribute medical devices in the European Union as if they were based in the European Union. The termination of the AFMP may impact our business operations by affecting our ability to attract and retain qualified personnel. Further, if the MRA ceased to apply, this could result in the European Union considering Swiss-based manufacturers to be third-country manufacturers with respect to CE Marking and the distribution of medical devices within the European Union, meaning that Swiss-based manufacturers would need to identify and designate third-party organizations located in one of the E.U. member states to serve as their respective authorized representatives. The termination of the MRA, and the subsequent failure to designate an authorized representative to enable the continued distribution and conformity assessments for medical devices in the European Union, may create barriers to trade.

USE OF PROCEEDS

We estimate that the net proceeds of the sale of our ordinary shares in this offering will be approximately \$69.9 million, or approximately \$80.5 million if the underwriters exercise in full their option to purchase 2,647,058 additional ordinary shares from us, after deducting the underwriting discount and estimated offering expenses payable by us.

We currently anticipate that we will use the net proceeds received by us to fund the ongoing development and commercialization of MosaiQ, as described elsewhere in this prospectus supplement and the documents incorporated by reference herein, as well as for working capital, operating expenses and other general corporate purposes.

Our expected use of the net proceeds from this offering is based upon our present plans and business condition. As of the date of this prospectus supplement, we cannot predict with certainty all of the particular uses for the net proceeds to be received upon the completion of this offering or the amounts that we will actually spend on the uses set forth above. The amounts and timing of our actual use of proceeds will vary depending on numerous factors, including the factors described under the heading “Risk Factors” in this prospectus supplement and under the heading “Risk Factors” beginning on page 17 of our FY 2020 10-K, which is incorporated by reference in this prospectus supplement. As a result, management will retain broad discretion over the allocation of the net proceeds from this offering, and investors will be relying on the judgment of our management regarding the application of the net proceeds.

Pending the use of the net proceeds of this offering as described above, we plan to invest the net proceeds of this offering on an interim basis in high-quality, short-term, interest-bearing obligations, investment-grade instruments or certificates of deposit.

DIVIDEND POLICY

We have never declared or paid cash dividends on our ordinary shares. We currently intend to retain all available funds and any future earnings, if any, to fund the development and expansion of our business and we do not anticipate paying any cash dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends, if any, will be made at the discretion of our Board of Directors and will depend on then existing conditions, including our results of operations, financial conditions, contractual restrictions, capital requirements, business prospects and other factors our Board of Directors may deem relevant. In particular, the indenture governing the Secured Notes contains certain restrictive covenants that limit our ability to pay dividends.

DILUTION

Our net tangible book value as of June 30, 2020 was approximately \$(30.8) million, or \$(0.38) per share. Net tangible book value per share is determined by dividing our total tangible assets, less total liabilities, by the number of ordinary shares outstanding as of June 30, 2020. Dilution in net tangible book value per share represents the difference between (i) the amount per share paid by investors purchasing ordinary shares in this offering and (ii) the net tangible book value per share immediately after this offering.

After giving effect to the sale of 17,647,059 ordinary shares in this offering at the public offering price of \$4.25 per share, and after deducting underwriting discounts and commissions and estimated offering expenses payable by us, our as adjusted net tangible book value as of June 30, 2020 would have been approximately \$39.1 million, or \$0.40 per share. This represents an immediate increase in net tangible book value of \$0.78 per share to existing shareholders and an immediate dilution in net tangible book value of \$3.85 per share to investors purchasing our ordinary shares in this offering.

The following table illustrates this dilution on a per share basis:

Public offering price per share	\$4.25
Net tangible book value per share as of June 30, 2020	\$(0.38)
Increase in net tangible book value per share attributable to this offering	<u>\$ 0.78</u>
As adjusted net tangible book value per share after this offering	\$0.40
Dilution per share to new investors purchasing ordinary shares in this offering	<u>\$3.85</u>

If the underwriters exercise in full their option to purchase an additional 2,647,058 of our ordinary shares at the public offering price of \$4.25 per share, our as adjusted net tangible book value per share would be \$0.49 per share, representing an immediate increase in net tangible book value of \$0.87 per share to existing shareholders and immediate dilution in net tangible book value of \$3.76 per share to investors purchasing ordinary shares in this offering.

The number of ordinary shares to be outstanding after this offering is based on 80,593,440 ordinary shares outstanding as of June 30, 2020, and excludes the following:

- 175,525 ordinary shares issuable upon the exercise of warrants outstanding as of June 30, 2020, at a weighted average exercise price of \$13.67 per ordinary share;
- 1,877,923 ordinary shares issuable upon the exercise of options outstanding as of June 30, 2020, at a weighted-average exercise price of \$7.71 per ordinary share;
- 896,130 ordinary shares issuable upon the vesting of RSUs and MRSUs outstanding as of June 30, 2020; and
- 70,991 ordinary shares reserved for future grant or issuance under the Second Amended and Restated 2014 Plan.

The information set forth above does not reflect the grant of options to purchase 45,922 ordinary shares, the exercise of options to purchase 12,000 ordinary shares, the grant of 27,573 RSUs, or the vesting of 58,248 RSUs, in each case subsequent to June 30, 2020. In addition, we will ask our shareholders at our 2020 annual general meeting to approve a proposed amendment and restatement of the Second Amended and Restated 2014 Plan to, among other amendments, increase the number of ordinary shares authorized for issuance by 750,000 shares.

To the extent that new options are issued under the Second Amended and Restated 2014 Plan or pursuant to any inducement award or we issue additional ordinary shares in the future (including upon any exercise of our warrants or options), there will be further dilution to investors participating in this offering. See “Risk Factors—You will incur immediate and substantial dilution as a result of this offering.”

CERTAIN U.S. FEDERAL TAX CONSIDERATIONS APPLICABLE TO HOLDERS OF ORDINARY SHARES

The following discussion is the opinion of Clifford Chance US LLP as to the material U.S. federal income tax consequences of the investment in an ordinary share, based upon the U.S. Internal Revenue Code of 1986, as amended (the “Code”), the U.S. Treasury regulations promulgated thereunder, judicial decisions, revenue rulings and revenue procedures of the Internal Revenue Service (“IRS”), and other administrative pronouncements of the Internal Revenue Service, all available as of the date hereof. This discussion is applicable to U.S. Holders (as defined below) that acquire our ordinary shares in this offering and hold our ordinary shares as capital assets for U.S. federal income tax purposes (generally property held for investment).

For purposes of this discussion you are a “U.S. Holder” if you are a beneficial owner of an ordinary share that is:

- an individual citizen or resident of the United States, as determined for U.S. federal income tax purposes;
- a corporation (or other entity treated as a corporation for U.S. federal income tax purposes) created or organized in or under the laws of the United States, any state thereof or the District of Columbia;
- an estate the income of which is subject to U.S. federal income taxation regardless of its source; or
- a trust if it is subject to the primary supervision of a court within the United States and one or more U.S. persons have the authority to control all substantial decisions of the trust.

This discussion does not address all U.S. federal income tax consequences applicable to you if you are subject to special treatment under the U.S. federal income tax laws, including if you are:

- a broker or dealer in securities, commodities or currencies;
- a financial institution;
- a regulated investment company;
- a real estate investment trust;
- an insurance company;
- an S corporation;
- a tax exempt organization;
- a person holding our ordinary shares as part of a hedging, wash sale, integrated or conversion transaction, a constructive sale or a straddle;
- a trader in securities that has elected the mark to market method of accounting for your securities;
- a person liable for alternative minimum tax;
- a U.S. expatriate or former U.S. citizen or long-term resident;
- an investor that holds ordinary shares through a financial account at a foreign financial institution that does not meet the requirements for avoiding withholding with respect to certain payments under Section 1471 of the Code;
- a person who directly, indirectly or constructively owns 10% or more of our stock by vote or value; or
- a person whose “functional currency” is not the U.S. dollar.

If a partnership (including any entity treated as a partnership for U.S. federal income tax purposes) holds ordinary shares, the tax treatment of a partner will depend upon the status of the partner and the activities of the partnership. If you are a partner of a partnership holding ordinary shares you should consult your tax advisors.

The authorities upon which this discussion is based are subject to change, which could apply retroactively, and are subject to differing interpretations, either of which could affect the U.S. federal income tax consequences discussed below. This discussion does not address all of the U.S. federal income tax consequences that may apply to you in light of your particular circumstances. Moreover, this discussion does not address any state, local or non-U.S. tax consequences, or any aspects of U.S. federal tax law other than income taxation. **If you are considering an investment in ordinary shares you should consult your own tax advisors concerning the U.S. federal income tax consequences to you in light of your particular circumstances as well as any consequences arising under the laws of any other taxing jurisdiction.**

The discussion below under “—Distributions on Ordinary Shares” and “—Sale or Other Taxable Disposition of Ordinary Shares” is subject to the passive foreign investment company (“PFIC”) rules discussed under “—Passive Foreign Investment Company.” See the discussion under “—Passive Foreign Investment Company.”

Distributions on Ordinary Shares

We currently do not expect to make any distributions to holders of our ordinary shares. If we make any distributions in respect of our ordinary shares, however, such distributions will be includible in a U.S. Holder’s income as dividends to the extent paid out of our current or accumulated earnings and profits, as determined under U.S. federal income tax principles. To the extent that the amount of any distribution exceeds our current and accumulated earnings and profits for a taxable year, as determined under U.S. federal income tax principles, the distribution will first be treated as a tax free return of capital, and the balance in excess of a U.S. Holder’s adjusted tax basis in the shares will be taxed as capital gain recognized on a sale or exchange. However, we do not expect to calculate our earnings and profits in accordance with U.S. federal income tax principles, and, accordingly, U.S. Holders should expect that a distribution will generally be reported as a dividend (as discussed above) even if that distribution (or a portion thereof) would otherwise be treated as a tax-free return of capital or as capital gain. Such dividends will not be eligible for the dividends received deduction allowed to U.S. corporations for dividends received from other U.S. corporations.

Dividends received by a non-corporate U.S. Holder from a qualified foreign corporation are treated as qualified dividend income provided that an investor holds the stock for at least 61 days within a specified 121-day period beginning on the date which is 60 days before the ex-dividend date and other requirements are satisfied. A non-U.S. corporation is treated as a qualified foreign corporation with respect to dividends received from that corporation on shares that are readily tradable on an established securities market in the United States. U.S. Department of the Treasury guidance indicates that shares are considered to be readily tradable on an established securities market in the United States if they are listed on The Nasdaq Global Market, where our ordinary shares are currently listed. Qualified dividend income received by non-corporate U.S. Holders, including individuals, is taxed at the rates applicable to long-term capital gains, which are lower than the rates applicable to ordinary income. We should be treated as a qualified foreign corporation so long as we are listed on The Nasdaq Global Market. U.S. Holders should consult their own tax advisors regarding the application of these rules given their particular circumstances.

Generally, dividends will constitute non-U.S. source “passive category” income for U.S. foreign tax credit purposes. U.S. Holders should consult their own tax advisors regarding how to account for dividends that are paid in a currency other than the U.S. dollar.

Sale or Other Taxable Disposition of Ordinary Shares

A U.S. Holder will recognize U.S. source capital gain or loss upon the sale or other taxable disposition of ordinary shares in an amount equal to the difference between the U.S. dollar value of the amount realized upon the disposition and the U.S. Holder’s adjusted tax basis in such ordinary shares. Any capital gain or loss will be long-term if the U.S. Holder’s holding period determined at the time of the sale or other taxable disposition for

[Table of Contents](#)

such ordinary shares exceeds one year. Certain non-corporate U.S. Holders, including individuals, are eligible for reduced rates of taxation on long-term capital gains. The deductibility of capital losses is subject to limitations. U.S. Holders should consult their own tax advisors regarding how to account for sale or other disposition proceeds that are paid in a currency other than the U.S. dollar.

Medicare Contribution Tax

Certain U.S. Holders that are individuals, estates or certain trusts must pay a 3.8% tax, or Medicare contribution tax, on their “net investment income.” Net investment income generally includes, among other things, dividend income and net gains from the disposition of stock. A U.S. Holder that is an individual, estate or trust should consult its tax advisor regarding the applicability of the Medicare contribution tax to its income and gains in respect of its investment in our ordinary shares.

Passive Foreign Investment Company

In general, a non-U.S. corporation is treated as a PFIC for any taxable year in which: (i) at least 75% of its gross income for such year is passive income or (ii) at least 50% of the value (determined on a quarterly basis) of its assets during such year is attributable to assets that produce or are held for the production of passive income. For this purpose, passive income includes dividends, interest, certain royalties and rents and gains from the disposition of passive assets. If a non-U.S. corporation owns, directly or indirectly, at least 25% (by value) of the stock of another corporation, such non-U.S. corporation will be treated, for purposes of the PFIC tests, as owning its proportionate share of the other corporation’s assets and receiving its proportionate share of the other corporation’s income.

Based on the composition of our income and value of our assets (determined using their fair market values), we do not believe we were a PFIC for our taxable year ended March 31, 2020 and do not currently expect to be a PFIC for the taxable year ending March 31, 2021 or in the foreseeable future. There can be no assurance in this regard, however, because our status as a PFIC is determined by all of the facts, which may change over time, on an annual basis and such determination depends, in part, on the application of complex U.S. federal income tax rules, which are subject to differing interpretations. A non-U.S. corporation is classified as a PFIC in any year in which it meets either the gross income or gross asset test discussed above. This depends on the actual financial results for each tax year in question. Accordingly, it is possible that we may become a PFIC in the current or any future taxable year due to changes in our asset or income composition. Because we value our goodwill based on the market value of our equity, a decrease in the price of our ordinary shares may also result in our becoming a PFIC. In addition, the composition of our income and assets will be affected by how, and how quickly, we spend the cash we raised in offerings.

If we are a PFIC for any taxable year during which a U.S. Holder holds our ordinary shares, such U.S. Holder will be subject to special tax rules with respect to any “excess distribution” received and any gain realized from a sale or other disposition, including a pledge, of ordinary shares. Distributions received in a taxable year that are greater than 125% of the average annual distributions received during the shorter of the three preceding taxable years or a U.S. Holder’s holding period for the ordinary shares will be treated as excess distributions. Under these special tax rules:

- the excess distribution or gain will be allocated ratably over a U.S. Holder’s holding period for the ordinary shares;
- the amount allocated to the current taxable year, and any taxable year prior to the first taxable year in which we were a PFIC, will be treated as ordinary income; and
- the amount allocated to each other year will be subject to tax at the highest tax rate in effect for that year and the interest charge applicable to underpayments of tax will be imposed on the resulting tax attributable to each such year.

[Table of Contents](#)

The tax liability for amounts allocated to taxable years prior to the year of disposition or excess distribution in which we were a PFIC cannot be offset by any net operating losses for such years, and gains (but not losses) realized on the sale or other disposition of the ordinary shares cannot be treated as capital gains, even if a U.S. Holder holds the ordinary shares as capital assets. In addition, non-corporate U.S. Holders will not be eligible for reduced rates of taxation on any dividends received from us, if we are a PFIC in the taxable year in which such dividends are paid or in the preceding taxable year. A U.S. Holder will be required to file Internal Revenue Service Form 8621 (or any other form specified by the U.S. Department of the Treasury) if such U.S. Holder holds our ordinary shares in any year in which we are a PFIC.

If we are a PFIC for any taxable year during which a U.S. Holder holds ordinary shares, our ordinary shares will continue to be treated as interests in a PFIC with respect to that U.S. Holder for all succeeding taxable years during which that U.S. Holder holds our ordinary shares unless we cease to be a PFIC and a U.S. Holder makes a “deemed sale” election with respect to the ordinary shares. If a U.S. Holder makes a deemed sale election, such U.S. Holder will be deemed to have sold ordinary shares held at their fair market value as of the last day of the last year during which we were a PFIC (the “termination date”). U.S. Holders are urged to consult their tax advisors regarding our possible status as a PFIC as well as the benefit of making an actual or protective deemed sale election.

In certain circumstances, in lieu of being subject to the excess distribution rules discussed above, a U.S. Holder may make an election to include gain on the stock of a PFIC as ordinary income under a mark-to-market method, provided that such stock is “regularly traded” on a “qualified exchange.” In general, our ordinary shares will be treated as “regularly traded” for a given calendar year if more than a *de minimis* quantity of our ordinary shares is traded on a qualified exchange on at least 15 days during each calendar quarter of such calendar year. Our ordinary shares are currently listed on The Nasdaq Global Market, which should be a “qualified exchange” for this purpose. Consequently, if we are a PFIC and our ordinary shares remain listed and regularly traded on The Nasdaq Global Market, the mark-to-market election will be available to U.S. Holders.

If a U.S. Holder makes an effective mark-to-market election, such U.S. Holder will include in each year as ordinary income the excess of the fair market value of the ordinary shares at the end of the year over the adjusted tax basis in the ordinary shares. Such U.S. Holder will be entitled to deduct as an ordinary loss each year the excess of the adjusted tax basis in the ordinary shares over their fair market value at the end of the year, but only to the extent of the net amount previously included in income as a result of the mark-to-market election. A U.S. Holder’s adjusted tax basis in the ordinary shares will be increased by the amount of any income inclusion and decreased by the amount of any deductions under the mark-to-market rules. Any distributions that we make generally will be subject to the rules discussed above under “—Distributions,” except that the lower rate applicable to qualified dividend income will not apply. If a U.S. Holder makes a mark-to-market election it will be effective for the taxable year for which the election is made and all subsequent taxable years (provided that, for any subsequent taxable year in which we are not a PFIC, a U.S. Holder will not include in income mark-to-market gain or loss) unless the ordinary shares are no longer regularly traded on a qualified exchange or the IRS consents to the revocation of the election. U.S. Holders are urged to consult their tax advisors about the availability and advisability of the mark-to-market election in their particular circumstances.

Investors in certain PFICs can elect to be taxed on their share of the PFIC’s ordinary income and net capital gain by making a qualified electing fund election (a “QEF election”), which, if made, would result in tax treatment different from (and generally less adverse than) the general tax treatment for PFICs described above under the excess distribution regime. We do not expect that a U.S. Holder will be eligible to make a QEF election with respect to our ordinary shares.

Each U.S. Holder is urged to consult its own tax advisor concerning the U.S. federal income tax consequences of holding ordinary shares if we are a PFIC in any taxable year during its holding period.

Holder Reporting Requirements

Certain U.S. Holders, including individuals and certain entities, that hold “specified foreign financial assets,” as defined in the Treasury regulations (which may include ordinary shares), other than in an account at a U.S. financial institution or the U.S. branch of a non-U.S. financial institution, are required to report certain information relating to such assets on Internal Revenue Service Form 8938 (Statement of Specified Foreign Financial Asset). U.S. Holders are urged to consult their tax advisors regarding the effect, if any, of this and any other reporting requirements on their ownership and disposition of our ordinary shares. Failure to comply with applicable reporting requirements could result in the imposition of substantial penalties.

A U.S. Holder who acquires ordinary shares for cash may be required to file Internal Revenue Service Form 926 (Return by a U.S. Transferor of Property to a Foreign Corporation) with the IRS and to supply certain additional information to the IRS if the amount of cash transferred to us in exchange for ordinary shares, when aggregated with all related transfers under applicable regulations, exceeds US\$100,000. Substantial penalties may be imposed on a U.S. Holder that fails to comply with this reporting requirement.

Information Reporting and Backup Withholding

A U.S. Holder may be subject to information reporting on amounts received by such U.S. Holder from a distribution on, or disposition of ordinary shares, unless such U.S. Holder establishes that it is exempt from these rules. If a U.S. Holder does not establish that it is exempt from these rules, it may be subject to backup withholding on the amounts received unless it provides a taxpayer identification number and otherwise complies with the requirements of the backup withholding rules. Backup withholding is not an additional tax and the amount of any backup withholding from a payment that is received will be allowed as a credit against a U.S. Holder’s U.S. federal income tax liability and may entitle such U.S. Holder to a refund, provided that the required information is timely furnished to the IRS.

lock-up agreement, (ii) no public announcement or public disclosure of entry into such plan is voluntarily made or required to be made and (iii) any such transfer or distribution shall not involve a disposition for value; and (B) in the case of any disposition pursuant to clause (h), no filing under the Exchange Act or other public announcement shall be required or shall be made voluntarily in connection with such disposition unless such filing or announcement clearly states that such disposition was made pursuant to an established trading plan meeting the requirements of Rule 10b5-1 under the Exchange Act. For purposes of this paragraph, “immediate family” shall mean the undersigned and the spouse, any lineal descendent, father, mother, brother or sister of the undersigned.

The representatives may, in their sole discretion and at any time or from time to time before the termination of the 90-day period, release all or any portion of the securities subject to lock-up agreements. There are no existing agreements between the underwriters and any of the company’s shareholders who will execute a lock-up agreement, providing consent to the sale of ordinary shares prior to the expiration of the lock-up period.

In connection with the offering, the underwriters may purchase and sell ordinary shares in the open market. These transactions may include short sales, stabilizing transactions and purchases to cover positions created by short sales. Short sales involve the sale by the underwriters of a greater number of ordinary shares than they are required to purchase in the offering, and a short position represents the amount of such sales that have not been covered by subsequent purchases. A “covered short position” is a short position that is not greater than the amount of additional ordinary shares for which the underwriters’ option described above may be exercised. The underwriters may cover any covered short position by either exercising their option to purchase additional ordinary shares or purchasing ordinary shares in the open market. In determining the source of ordinary shares to cover the covered short position, the underwriters will consider, among other things, the price of ordinary shares available for purchase in the open market as compared to the price at which they may purchase additional ordinary shares pursuant to the option described above. “Naked” short sales are any short sales that create a short position greater than the amount of additional ordinary shares for which the option described above may be exercised. The underwriters must cover any such naked short position by purchasing ordinary shares in the open market. A naked short position is more likely to be created if the underwriters are concerned that there may be downward pressure on the price of the ordinary shares in the open market after pricing that could adversely affect investors who purchase in the offering. Stabilizing transactions consist of various bids for or purchases of ordinary shares made by the underwriters in the open market prior to the completion of the offering.

The underwriters may also impose a penalty bid. This occurs when a particular underwriter repays to the underwriters a portion of the underwriting discount received by it because the representatives have repurchased ordinary shares sold by or for the account of such underwriter in stabilizing or short covering transactions.

Purchases to cover a short position and stabilizing transactions, as well as other purchases by the underwriters for their own accounts, may have the effect of preventing or retarding a decline in the market price of the company’s ordinary shares, and together with the imposition of the penalty bid, may stabilize, maintain or otherwise affect the market price of the ordinary shares. As a result, the price of the ordinary shares may be higher than the price that otherwise might exist in the open market. The underwriters are not required to engage in these activities and may end any of these activities at any time. These transactions may be effected on Nasdaq, in the over-the-counter market or otherwise.

The company has agreed to indemnify the several underwriters against certain liabilities, including liabilities under the Securities Act of 1933.

The underwriters and their respective affiliates are full service financial institutions engaged in various activities, which may include sales and trading, commercial and investment banking, advisory, investment management, investment research, principal investment, hedging, market making, brokerage and other financial and non-financial activities and services. Certain of the underwriters and their respective affiliates have provided, and may in the future provide, a variety of these services to the issuer and to persons and entities with relationships with the issuer, for which they received or will receive customary fees and expenses.

Table of Contents

In the ordinary course of their various business activities, the underwriters and their respective affiliates, officers, directors and employees may purchase, sell or hold a broad array of investments and actively trade securities, derivatives, loans, commodities, currencies, credit default swaps and other financial instruments for their own account and for the accounts of their customers, and such investment and trading activities may involve or relate to assets, securities and/or instruments of the issuer (directly, as collateral securing other obligations or otherwise) and/or persons and entities with relationships with the issuer. The underwriters and their respective affiliates may also communicate independent investment recommendations, market color or trading ideas and/or publish or express independent research views in respect of such assets, securities or instruments and may at any time hold, or recommend to clients that they should acquire, long and/or short positions in such assets, securities and instruments.

Overview

We are a commercial-stage diagnostics company committed to reducing healthcare costs and improving patient care through the provision of innovative tests within established markets. Our initial focus is on blood grouping and donor disease screening, which is commonly referred to as transfusion diagnostics. Blood grouping involves specific procedures performed at donor or patient testing laboratories to characterize blood, which includes antigen typing and antibody detection. Disease screening involves the screening of donor blood for unwanted pathogens using two different methods, a serological approach (testing for specific antigens or antibodies) and a molecular approach (testing for DNA or RNA). We believe that MosaiQ, our proprietary technology platform, may also have application beyond transfusion diagnostics in the larger clinical diagnostics market where testing currently performed using separate immunoassay and molecular testing techniques for a single diagnosis could be combined on one testing technology permitting multiple tests simultaneously with a simplified workflow.

We have over 35 years of experience developing, manufacturing and commercializing conventional reagent products used for blood grouping within the global transfusion diagnostics market. We are developing MosaiQ to better address the comprehensive needs of this large and established market. MosaiQ will initially comprise two separate microarrays, one for immunohematology (blood grouping), or IH, and one for serological disease screening, or SDS, and a high-throughput instrument. We are also developing a third microarray for molecular disease screening. We believe MosaiQ has the potential to transform transfusion diagnostics, significantly reducing the cost of blood grouping in the donor and patient testing environments, while improving patient outcomes.

We have a proven track record and significant expertise in product development, manufacturing and quality assurance, tailored to the highly regulated transfusion diagnostics market. We currently derive revenue from a portfolio of products used for blood grouping, as well as whole blood controls used daily for quality assurance testing of third-party blood grouping instruments. We have introduced a range of U.S. Food and Drug Administration, or FDA, licensed products in the United States under the Quotient brand, which we sell directly to donor testing laboratories, hospitals and independent patient testing laboratories. We also develop, manufacture and sell conventional reagent products to original equipment manufacturers, or OEMs, such as Ortho-Clinical Diagnostics, Inc. (or Ortho), Bio-Rad Laboratories, Inc., and Grifols S.A. In July and December 2019, the FDA licensed a range of conventional reagent products developed and manufactured by us for use on instrument platforms commercialized by Ortho.

The issued share capital of our company as of August 20, 2020 was 80,656,043 fully paid ordinary shares of nil par value and 666,665 fully paid 7% cumulative redeemable preference shares of nil par value.

Ordinary Shares

Ordinary shares we may issue from time to time will have no preemptive rights or other rights to subscribe for additional ordinary shares, no rights of redemption, conversion or exchange and no sinking fund rights. In the event of liquidation, dissolution or winding-up, the holders of our ordinary shares are entitled to share equally and ratably in our assets, if any, remaining after the payment of all our debts and liabilities and the liquidation preference of any issued and outstanding preference shares, if applicable. Existing Preference Shares

7% Cumulative Redeemable Preference Shares

On January 30, 2015, we issued in a private placement 666,665 7% cumulative redeemable preference shares, which we refer to below as the preference shares, at a price of \$22.50 per share, for an aggregate subscription price of approximately \$15 million. The material terms and provisions of the preference shares, as set forth in the Statement of Rights in relation to Preference Shares in the capital of the Company, or the Statement of Rights, are summarized below. The following description is subject to, and qualified in its entirety by, the Statement of Rights, which is filed as an exhibit to our Current Report on Form 8-K filed with the SEC on January 30, 2015 and incorporated by reference into this prospectus. You should review a copy of the Statement of Rights for a complete description of the terms and conditions applicable to the preference shares.

Each preference share has a right to a cumulative preferential dividend of 7% per annum of the subscription price paid for that preference share on and from the date of issue of such preference share to (but excluding) the date of redemption of such preference share, or the Preferential Dividend. The Preferential Dividend accrues quarterly and is payable in connection with the redemption of the preference shares. We have the right (but are under no obligation) to make payments from time to time of some or all of the then accrued but unpaid Preferential Dividend balance, and will not declare or pay dividends or make any other distributions of income or profits to the holders of our ordinary shares for so long as any accrued Preferential Dividend remains accrued but unpaid.

The holders of the preference shares have the right to require us to redeem the preference shares after four years, or the Holder Redemption Trigger Date, subject to our right to extend the Holder Redemption Trigger Date in one year increments up to a maximum of ten (10) years from the issue date. In January 2020, we issued a notice to extend the Holder Redemption Trigger Date until January 2022. We have the right to redeem all or some of the preference shares at any time. The preference shares are subject to automatic redemption upon a Change of Control of our company as defined in the Statement of Rights. On the redemption of the preference shares, we will first pay the amount of the accrued Preferential Dividend and then the redemption price per preference share, which is equal to the subscription price paid therefor.

On a winding-up or liquidation of our company, the preference shares will rank *pari passu* with our ordinary shares with respect to the repayment of amounts paid up thereon. Immediately prior to a winding-up or liquidation of our company, all accrued and unpaid Preferential Dividends in respect of the preference shares will be capitalized into new preference shares on the basis of one (1) new preference share for each whole \$22.50 of Preferential Dividend accrued.

The holders of the preference shares are subject to certain transfer restrictions and also have certain other rights described in the Statement of Rights.

Memorandum and Articles of Association

Public limited companies formed under the laws of Jersey, Channel Islands are governed in general by two organizational documents, a Memorandum of Association and Articles of Association. The Memorandum of Association sets forth the basic constitutional details of the company and its authorized share capital. The Articles of Association set forth other general corporate matters, including the rights of shareholders and provisions concerning shareholder and director meetings and directors' terms and fees. The full text of both our Memorandum of Association and Articles of Association have been previously filed with the SEC and are incorporated by reference as exhibits to the registration statement of which this prospectus forms a part.

Quotient Memorandum of Association

Under the Jersey Companies Law, the capacity of a Jersey company is not limited by anything contained in its Memorandum or Articles of Association. Accordingly, we are able to operate in any markets and to provide

Table of Contents

any services which are legally permissible and that the directors deem appropriate. Our Memorandum of Association permits us to issue an unlimited number of shares and warrants.

Quotient Articles of Association

Voting rights

Each shareholder (other than a holder of preference shares) is entitled to one vote on a show of hands and to one vote per share held by such shareholder on a poll. There is no cumulative voting of shares.

Shareholders are ineligible to vote (unless our board determines otherwise) if any call or other sum presently payable by the shareholder to us in connection with such shares remains unpaid.

No holder of a preference share is entitled to vote (either in person or by proxy and whether by ballot or on a show of hands) at any general meeting of the Company or be counted in determining the total number of votes which may be cast at any such meeting, or required for the purposes of an ordinary resolution or special resolution of any members or any class of members, or for the purposes of any other consent required under our Articles of Association, except that the holders of preference shares are entitled to receive notice of, attend and vote at any meeting of the holders of preference shares as a class, where each holder of a preference share is entitled to vote one vote per share on a poll.

Transfer of Shares

Shareholders may transfer certificated shares through a customary share transfer form and the presentation of the applicable physical share certificate. Any of our shares purchased on Nasdaq represent only beneficial interests in the underlying aggregate certificated share position held by DTC. Transfers in "street name" through the DTC system are legally considered a transfer of the beneficial interest and are to be conducted in accordance with Nasdaq and DTC procedures.

Beneficial holders in "street name" may request at any time that actual ordinary shares in certificated form be registered in their name, which would therefore accord them full rights as legal shareholders under Jersey law. A beneficial holder's broker may obtain on such holder's behalf shares in certificated form through Continental Stock Transfer & Trust Company, our transfer agent. However, the conversion from a beneficial interest in securities legally owned by Cede & Co., the nominee used by DTC, as holder of legal title to the securities to actual securities, and *vice versa*, may require both time and the payment of processing fees to our transfer agent in addition to fees that may be levied by a beneficial holder's brokerage firm.

Our Board of Directors in its discretion may suspend the registration of transfers of shares for periods not exceeding thirty (30) days in any year. Our Board of Directors may also decline to register transfers of shares:

- that are not fully paid; and
- upon which we have a lien.

If our Board of Directors declines to register a transfer of shares, we must notify the transferee within two (2) months thereafter.

Dividends and Other Distributions

In order to be able to declare any dividends, our directors must issue a statutory solvency statement to the effect that, immediately following the date on which the dividends are proposed to be paid, the company will be able to discharge its liabilities as they fall due and, having regard to the prospects of the company and to the intentions of the directors with respect to the management of the company's business and the amount and

Table of Contents

character of the financial resources that will in the view of the directors be available to the company, the company will be able to continue to carry on business and discharge its liabilities as they fall due for the twelve (12) months immediately following the date on which the dividend is proposed to be paid (or until the company is dissolved on a solvent basis, if earlier).

Dividends (other than a preferential dividend) must be apportioned and paid *pro rata* according to the amounts paid on shares, unless otherwise specified in the rights attached to a specific class or classes of shares. Dividends (other than a preferential dividend) do not accrue interest and may, if unclaimed, be invested by our Board of Directors on our behalf until claimed. Any dividend unclaimed after a period of twelve (12) years from the date of declaration of such dividend or the date on which such dividend became due for payment is forfeited and becomes our property.

Our Articles of Association provide that our Board of Directors may offer our shareholders the right to receive in lieu of any cash dividend (or part thereof) that we declare on our ordinary shares, such number of our ordinary shares that are (or nearly as possible) equivalent in value to the cash dividend, based on the market price of such shares determined in accordance with our Articles of Association.

The terms of our preference shares provide that, other than the Preferential Dividend, no holder of preference shares has any right to participate in any distribution made by the Company, whether of income, profits or otherwise.

Winding Up

If we are wound up (whether the liquidation is voluntary, under supervision, or by the courts of Jersey) the liquidator (or the board, where no liquidator is appointed) may, with the authority of a special resolution of our shareholders, divide among our shareholders part or all of our assets, or transfer any part of our assets to a trustee for the benefit of our shareholders.

Changes in Capital and Allotment of Securities

We may, by special resolution of our shareholders, alter our Memorandum of Association to increase or reduce the number of shares that we are authorized to issue, to consolidate all or any of our shares (whether issued or not) into fewer shares or to divide all or any of our shares (whether issued or not) into more shares, in each case in compliance with the Jersey Companies Law.

Subject to the provisions of the Jersey Companies Law, our board has the discretion to issue authorized but unissued shares.

Variation of Class Rights

The rights attaching to any class of shares may only be altered by written consent of holders of not less than two-thirds (2/3) in number of the issued shares of that class, or by special resolution of the relevant class passed at a class shareholder meeting by the holders of not less than two-thirds (2/3) in number of the issued shares of that class being voted in person or by proxy at such meeting.

Change in Control

There are no provisions in our Articles of Association which would have an effect of delaying, deferring or preventing a change in our control.

General Meetings

An annual general meeting and any other shareholders' meeting (whether convened for the passing of an ordinary or a special resolution of our shareholders) shall be called by at least fourteen (14) clear days' notice given to our shareholders, directors and our auditors.

[Table of Contents](#)

Borrowing Powers

Our Board of Directors has the full authority to authorize our entry into agreements to borrow money, to grant security over our assets and to issue debentures and other securities whether outright or as collateral security for any debt, liability or obligation of us or of any third party.

Directors

We may, by resolution of our shareholders, vary the minimum or maximum number of directors (subject to a minimum of two (2) directors). Currently the minimum number of directors is two (2) and there is no maximum number of directors. We currently have eight (8) members on our Board of Directors.

Shareholders are only able to appoint a person as a director at a shareholder meeting if (i) the relevant person has been recommended by our board or is a serving director who is retiring at that shareholder meeting; or (ii) if a shareholder (other than the person proposed as a director) who is entitled to attend and vote at that shareholder meeting has submitted written notice to us of their intention to nominate the relevant person during the period from (and including) the date that is one hundred twenty (120) days before, to and including the date that is ninety (90) days before, the first anniversary of the last annual general meeting of the Company meeting, along with a notice from the relevant person confirming their willingness to be appointed.

Directors are required to disclose any conflicts of interest with respect to any contract or proposed contract or any other arrangement or proposed arrangement with us.

Other Jersey Law Considerations

Purchase of Own Shares

As with declaring a dividend, we may not buy back or redeem our shares unless our directors who are to authorize the buy back or redemption have made a statutory solvency statement that, immediately following the date on which the buy back or redemption is proposed, the company will be able to discharge its liabilities as they fall due and, having regard to prescribed factors, the company will be able to continue to carry on business and discharge its liabilities as they fall due for the twelve (12) months immediately following the date on which the buy back or redemption is proposed (or until the company is dissolved on a solvent basis, if earlier).

If the above conditions are met, we may purchase shares in the manner described below.

We may purchase on a stock exchange our own fully paid shares pursuant to a special resolution of our shareholders. The resolution authorizing the purchase must specify:

- the maximum number of shares to be purchased;
- the maximum and minimum prices which may be paid; and
- a date, not being later than five (5) years after the passing of the resolution, on which the authority to purchase is to expire.

We may purchase our own fully paid shares otherwise than on a stock exchange pursuant to a special resolution of our shareholders but only if the purchase is made on the terms of a written purchase contract which has been approved by an ordinary resolution of our shareholders. The shareholder from whom we propose to purchase or redeem shares is not entitled to take part in such shareholder vote in respect of the shares to be purchased.

We may fund a redemption or purchase of our own shares from any source. We cannot purchase our shares if, as a result of such purchase, only redeemable shares would remain in issue.

Table of Contents

If authorized by a resolution of our shareholders, any shares that we redeem or purchase may be held by us as treasury shares. Any shares held by us as treasury shares may be cancelled, sold, transferred for the purposes of or under an employee share scheme or held without cancelling, selling or transferring them. Shares redeemed or purchased by us are cancelled where we have not been authorized to hold these as treasury shares.

Mandatory Purchases and Acquisitions

The Jersey Companies Law provides that where a person has made an offer to acquire a class of all of our outstanding shares not already held by the person and has as a result of such offer acquired or contractually agreed to acquire ninety percent (90%) or more of such outstanding shares, that person is then entitled (and may be required) to acquire the remaining shares. In such circumstances, a holder of any such remaining shares may apply to the Jersey court for an order that the person making such offer not be entitled to purchase the holder's shares or that the person purchase the holder's shares on terms different to those under which the person made such offer.

Other than as described above, we are not subject to any regulations under which a shareholder that acquires a certain level of share ownership is then required to offer to purchase all of our remaining shares on the same terms as such shareholder's prior purchase.

Compromises and Arrangements

Where we and our creditors or shareholders or a class of either of them propose a compromise or arrangement between us and our creditors or our shareholders or a class of either of them (as applicable), the Jersey court may order a meeting of the creditors or class of creditors or of our shareholders or class of shareholders (as applicable) to be called in such a manner as the court directs. Any compromise or arrangement approved by a majority in number representing seventy-five percent (75%) or more in value of the creditors or seventy-five percent (75%) or more of the voting rights of shareholders or class of either of them (as applicable) if sanctioned by the court, is binding upon us and all the creditors, shareholders or members of the specific class of either of them (as applicable).

Whether the capital of the company is to be treated as being divided into a single or multiple class(es) of shares is a matter to be determined by the court. The court may in its discretion treat a single class of shares as multiple classes, or multiple classes of shares as a single class, for the purposes of the shareholder approval referred to above taking into account all relevant circumstances, which may include circumstances other than the rights attaching to the shares themselves.

No Pre-Emptive Rights

The Jersey Companies Law does not confer any pre-emptive rights to purchase our shares or warrants on our security holders.

Rights of Minority Shareholders

Under Article 141 of the Jersey Companies Law, a shareholder may apply to court for relief on the ground that the conduct of our affairs, including a proposed or actual act or omission by us, is "unfairly prejudicial" to the interests of our shareholders generally or of some part of our shareholders, including at least the shareholder making the application. What amounts to unfair prejudice is not defined in the Jersey Companies Law. There may also be common law personal actions available to our shareholders.

Under Article 143 of the Jersey Companies Law (which sets out the types of relief a court may grant in relation to an action brought under Article 141 of the Jersey Companies Law), the court may make an order regulating our affairs, requiring us to refrain from doing or continuing to do an act complained of, authorizing civil proceedings and providing for the purchase of shares by us or by any of our other shareholders.

DESCRIPTION OF THE DEBT SECURITIES

The following description of our debt securities sets forth certain terms and provisions of our debt securities that we may offer from time to time in one or more distinct series. This section summarizes certain terms of any debt securities that we anticipate will be common to all series that we may offer under this prospectus. Please note that the terms of any series of debt securities that we may offer may differ significantly from the common terms described in this prospectus. Most of the specific terms of any series of debt securities that we offer, and any differences from the common terms described in this prospectus, will be described in the prospectus supplement for such securities to be attached to the front of this prospectus.

An indenture will govern any debt securities that we issue. An indenture is a contract between us and a financial institution acting as trustee on your behalf. We will enter into an indenture with an institution having corporate trust powers, which will act as trustee, relating to any debt securities that are offered by this prospectus. The indenture will be subject to the Trust Indenture Act of 1939, as amended. The trustee under an indenture has the following two main roles:

- the trustee can enforce your rights against us if we default; there are some limitations on the extent to which the trustee acts on your behalf, which are described later in this prospectus; and
- the trustee will perform certain administrative duties for us, which include sending you interest payments and notices.

As this section is a summary of some of the terms of the debt securities we may offer under this prospectus, it does not describe every aspect of the debt securities. In particular, the form of indenture we have previously filed and have incorporated by reference as an exhibit to the registration statement of which this prospectus forms a part is a base indenture which contemplates that the specific terms of any debt securities may be set forth in one or more resolutions of our board of directors or supplemental indentures to the indenture. We urge you to read the indenture and the other documents (including any supplemental indentures) we file with the SEC relating to the debt securities because the indenture for those securities and those other documents, and not this description, will define your rights as a holder of our debt securities. We will file any such other documents (including any supplemental indentures) as exhibits to an annual, quarterly or other report that we file with the SEC. See “Where You Can Find More Information” for information on how to access the indenture and any such other documents. References to the “indenture” mean the indenture that will define your rights as a holder of debt securities, a form of which we have filed as an exhibit to the registration statement. The actual indenture we enter into in connection with an offering of debt securities may differ significantly from the form of indenture we have filed.

General

The indenture does not limit the aggregate principal amount of our debt securities that we may issue. We may issue our debt securities under the indenture from time to time in one or more series. The indenture does not limit the amount of other indebtedness, or our debt securities other than secured indebtedness, which we or our subsidiaries may issue.

Unless otherwise provided in a prospectus supplement, our senior debt securities will be our unsecured obligations and will rank equally with all of our other unsecured and unsubordinated indebtedness. Our subordinated debt securities will be our unsecured obligations and will be subordinated in right of payment to the prior payment in full of all of our senior indebtedness.

Each prospectus supplement will describe the following terms of the offered debt securities:

- the title of the series;
- any limit on the aggregate principal amount;
- the principal payment dates;

- any other terms, conditions, rights and preferences of our debt securities and any other deletions from or modifications or additions to the indenture, which may not be consistent with the terms set forth in this prospectus.

We will have the ability under the indenture to “reopen” a previously issued series of debt securities and issue additional debt securities of that series or establish additional terms of that series.

Unless otherwise set forth in the applicable prospectus supplement, principal of, premium and interest on our debt securities will initially be payable at the corporate trust office of the trustee or any other office or agency designated by us. Interest on our debt securities issued in registered form:

- may be paid by check mailed to the persons entitled to the payments at their addresses appearing on the security register or by transfer to an account maintained by the payee with a bank located in the United States; and
- will be payable on any interest payment date to the persons in whose names the debt securities are registered at the close of business on the regular record date with respect to the interest payment date.

We will designate the initial paying agents, which will be named in the applicable prospectus supplement, and may, at any time, designate additional paying agents, rescind the designation of any paying agent or approve a change in the office through which any paying agent acts. However, we are required to maintain a paying agent in each place where the principal of or any premium or interest on our debt securities are payable.

Unless otherwise set forth in the applicable prospectus supplement, you may present our debt securities for transfer, duly endorsed or accompanied by a written instrument of transfer if so required by us or the security registrar, or exchange for other debt securities of the same series containing identical terms and provisions, in any authorized denominations, and of a like aggregate principal amount, in each case at the office or agency maintained by us for this purpose, which will initially be the corporate trust office of the trustee. Any transfer or exchange will be made without service charge, although we may require payment of a sum sufficient to cover any tax or other governmental charge and any other expenses then payable. We are not required to:

- issue, register the transfer of, or exchange our debt securities during a period beginning at the opening of business 15 days before the day of mailing of a notice of redemption of any debt securities and ending at the close of business on the day of mailing; or
- register the transfer of or exchange any debt security selected for redemption, in whole or in part, except the unredeemed portion of any debt security being redeemed in part.

Unless otherwise set forth in the applicable prospectus supplement, we will only issue our debt securities in fully registered form without coupons in minimum denominations of \$1,000 and any integral multiple of \$1,000. If our debt securities are issued in bearer form, any restrictions and considerations, including offering restrictions and U.S. federal income tax considerations applicable to these securities and to payment on and transfer and exchange of these securities, will be described in the applicable prospectus supplement.

Table of Contents

Our debt securities may be issued as original issue discount securities, which means that they will bear no interest or bear interest at a rate which, at the time of issuance, is below market rates. Our debt securities issued as original issue discount securities will be sold at a substantial discount below their principal amount.

U.S. federal income tax and other considerations applicable to original issue discount securities will be described in the applicable prospectus supplement.

If the purchase price, or the principal of, or any premium or interest on any of our debt securities is payable in, or if any of our debt securities are denominated in, one or more foreign currencies or currency units, the restrictions, elections, U.S. federal income tax considerations, specific terms and other information will be set forth in the applicable prospectus supplement.

Unless otherwise set forth in the applicable prospectus supplement, the indenture will not limit our ability to incur indebtedness or protect holders of our debt securities in the event of a sudden and significant decline in our credit quality or a takeover, recapitalization or highly leveraged or similar transaction involving us. Accordingly, we could in the future enter into transactions that could increase the amount of our outstanding indebtedness or otherwise affect our capital structure or credit rating.

There is no requirement that we issue debt securities in the future under the indenture, and we may use other indentures or documentation, containing different provisions in connection with future issues of other debt securities.

Conversion and Exchange

The terms, if any, on which our debt securities are convertible into or exchangeable for, either mandatorily or at our or your option, property or cash, ordinary shares, preference shares or other securities, whether or not issued by us, or a combination of any of these, will be set forth in the applicable prospectus supplement.

Global Securities

Our debt securities may be issued, in whole or in part, in the form of one or more global securities that will be deposited with, or on behalf of, a depository identified in the applicable prospectus supplement and registered in the name of the depository or its nominee. Interests in any global debt security will be shown on, and transfers of our debt securities will be effected only through, records maintained by the depository and its participants as described below.

The specific terms of the depository arrangement will be described in the applicable prospectus supplement.

Covenants Applicable to Debt Securities

The prospectus supplement related to an issuance of debt securities by us will set forth covenants that impose limitations and restrictions on us and our subsidiaries.

Consolidation, Amalgamation, Merger and Sale of Assets

The indenture provides that we may not:

- consolidate or amalgamate with or merge into any person or convey, sell, transfer or lease our properties and assets as an entirety or substantially as an entirety to any person; or
- permit any person to consolidate or amalgamate with or merge into us, or convey, sell, transfer or lease its properties and assets as an entirety or substantially as an entirety to us;

Table of Contents

unless:

- the surviving entity (if other than us) expressly assumes the payment of all amounts on all of our debt securities and the performance of our obligations under the indenture and our debt securities;
- the surviving entity (if other than us) provides for conversion or exchange rights in accordance with the provisions of our debt securities of any series that are convertible or exchangeable into ordinary shares or other securities;
- immediately after giving effect to the transaction no event of default, and no event which after notice or lapse of time or both would become an event of default, will have happened and be continuing; and
- we deliver an officers' certificate and legal opinion to the trustee with respect to the transaction.

Events of Default

Unless otherwise stated in the applicable prospectus supplement, each of the following events will constitute an event of default under the indenture for any series of debt securities issued hereunder:

- default in the payment of any interest on any debt security of such series when the interest becomes due and payable, and continuance of this default for a period of 30 days;
- default in the payment of the principal of or any premium on any debt security of such series when the principal or premium becomes due and payable either at maturity, upon any redemption, by declaration of acceleration or otherwise;
- default in the deposit of any sinking fund payment when due;
- default in the performance of any covenant in respect of the debt securities of such series, and the continuance of this default for a period of 60 days after we have received written notice from the trustee or the holders;
- our bankruptcy, insolvency or reorganization; and
- any other event of default, which will be described in the applicable prospectus supplement.

If an event of default with respect to our debt securities of any series, other than events of bankruptcy, insolvency or reorganization, occurs and is continuing, either the trustee or the holders of not less than 25% in principal amount of the outstanding debt securities of the series may declare the principal amount, or a lesser amount as may be provided for in our debt securities, of all outstanding debt securities of the series to be immediately due and payable by written notice. At any time after a declaration of acceleration has been made, but before a judgment or decree for payment of money has been obtained by the trustee, generally, the holders of not less than a majority in principal amount of the debt securities of the series may rescind and annul the declaration of acceleration. Any event of bankruptcy, insolvency or reorganization will cause the principal amount and accrued interest, or the lesser amount as provided for in our debt securities, to become immediately due and payable without any declaration or other act by the trustee or any holder.

The indenture provides that, within 90 days after the occurrence of any event which is, or after notice or lapse of time or both would become, an event of default the trustee will transmit notice of the default to each holder of our debt securities unless the default has been cured or waived. However, except in the case of a default in the payment of principal of, or premium, or interest, if any, on or any sinking fund or purchase fund installment with respect to any debt security, the trustee may withhold this notice if and so long as the board of directors, executive committee or trust committee of directors and/or responsible officers of the trustee determines in good faith that the withholding of the notice is in the best interest of the holders.

If an event of default occurs and is continuing with respect to our debt securities of any series, the trustee may, in its discretion, proceed to protect and enforce its rights and the rights of the holders of our debt securities

Table of Contents

by all appropriate judicial proceedings. The indenture provides that, subject to the duty of the trustee during any default to act with the required standard of care, the trustee will be under no obligation to exercise any of its rights or powers under the indenture at the request or direction of any of the holders, unless the holders have offered the trustee reasonable indemnity. Subject to these indemnification provisions, the holders of a majority in principal amount of our outstanding debt securities of any series will generally have the right to direct the time, method and place of conducting any proceeding for any remedy available to the trustee, or exercising any trust or power conferred on the trustee, with respect to the debt securities of such series.

Modification and Waiver

We and the trustee may modify or amend the indenture with the consent of the holders of not less than a majority in principal amount of the outstanding debt securities of each series affected by the modification or amendment, so long as the modification or amendment does not, without the consent of each affected holder:

- change the stated maturity of the principal of or any premium or installment of interest on any debt security;
- reduce the principal amount of, or the rate, or modify the calculation of the rate, of interest on, or any premium payable upon the redemption of, any debt security;
- reduce the amount of the principal of an original issue discount security that would be due and payable upon a declaration of acceleration of the maturity of the original issue discount security or the amount provable in bankruptcy;
- change the place of payment or the coin or currency in which the principal of or any premium or interest on with respect to any debt security is payable;
- impair the right to institute suit for the enforcement of any payment on or after the stated maturity of any debt security or, in the case of redemption, on or after the redemption date or, in the case of repayment at the option of any holder, on or after the repayment date;
- reduce the percentage in principal amount of our outstanding debt securities, the consent of whose holders is required in order to take specific actions;
- modify any of the provisions regarding the waiver of past defaults and the waiver of specified covenants by the holders of our debt securities, except to increase any percentage of consents required;
- make any change that adversely affects the right to convert or exchange any debt security into or for our ordinary shares or other securities, whether or not issued by us, cash or property in accordance with its terms;
- modify any of the provisions of any supplemental indenture relating to the subordination of our subordinated debt securities in a manner adverse to holders of our subordinated debt securities; or
- modify any of the above provisions of the indenture dealing with modification and waiver in any other respect, except to increase any percentage of consents required to amend the indenture or for any waiver or to add to the provisions that cannot be modified without the approval of each affected holder.

We and the trustee may modify or amend the indenture and our debt securities of any series without the consent of any holder in order to, among other things:

- provide for a successor to our company pursuant to a consolidation, amalgamation, merger or sale of assets;
- add to our covenants for the benefit of the holders of all or any series of our debt securities or to surrender any right or power conferred upon us;
- provide for a successor trustee with respect to our debt securities of all or any series;

Table of Contents

- cure any ambiguity or correct or supplement any provision which may be defective or inconsistent with any other provision, or to make any other provisions with respect to matters or questions arising under the indenture which will not adversely affect the interests of the holders of our debt securities of any series;
- change the conditions, limitations and restrictions on the authorized amount, terms or purposes of issue, authentication and delivery of our debt securities;
- add any additional events of default with respect to all or any series of our debt securities;
- add guarantees of any series of our debt securities or secure any series of our debt securities;
- provide for conversion or exchange rights of the holders of any series of our debt securities;
- make any other change that does not materially adversely affect the interests of the holders of any of our debt securities then outstanding; or
- comply with any requirement of the SEC in connection with the qualification of the indenture under the U.S. Trust Indenture Act of 1939.

The holders of not less than a majority in principal amount of our outstanding debt securities of any series may, on behalf of the holders of all debt securities of that series, waive any past default and its consequences with respect to the debt securities of that series, except a default:

- in the payment of principal of or any premium or interest on the debt securities of that series; or
- in respect of a covenant or provision that cannot be modified or amended without the consent of the holder of each outstanding debt security of any series affected.

Under the indenture, we must annually furnish the trustee with a statement regarding our performance of specified obligations and any default in our performance under the indenture. We are also required to deliver to the trustee, within five days after its occurrence, written notice of any event of default, or any event which after notice or lapse of time or both would constitute an event of default, resulting from the failure to perform any covenant contained in the indenture or our debt securities.

Defeasance and Covenant Defeasance

We may discharge all our obligations on our debt securities, which we refer to as defeasance, or elect to be discharged from complying with certain covenants in the indenture, except for certain ministerial obligations, like registering transfers or exchanges of our debt securities, which we refer to as covenant defeasance.

Defeasance or covenant defeasance, as the case may be, will be conditioned upon the irrevocable deposit by us with the trustee, in trust, of a cash amount or government obligations, or both, which, through the scheduled payment of principal and interest in accordance with their terms, will provide money in an amount sufficient to pay the principal of and any premium and interest on our debt securities on the scheduled due dates.

We may only do this if, among other things:

- the defeasance or covenant defeasance does not result in a breach or violation of, or constitute a default under, the indenture or any other material agreement or instrument to which we are a party or by which we are bound;
- no event of default or event which with notice or lapse of time or both would become an event of default with respect to our debt securities to be defeased will have occurred and be continuing on the date of establishment of the trust and, with respect to defeasance only, there shall not have occurred a bankruptcy, insolvency or reorganization at any time during the period ending on the 91st day after that date; and

Table of Contents

- we have delivered to the trustee an opinion of counsel to the effect that you will not recognize income, gain or loss for U.S. federal income tax purposes as a result of the defeasance or covenant defeasance and will be subject to U.S. federal income tax on the same amounts, in the same manner and at the same times as would have been the case if the defeasance or covenant defeasance had not occurred. The opinion of counsel, in the case of defeasance, must refer to and be based upon a letter ruling of the Internal Revenue Service received by us, a revenue ruling published by the Internal Revenue Service or a change in applicable U.S. federal income tax law occurring after the date of the indenture.

New York Law to Govern

The indenture and our debt securities will be governed by, and construed in accordance with, the laws of the state of New York.

We will irrevocably submit to the non-exclusive jurisdiction of any New York state court or any U.S. federal court sitting in the Borough of Manhattan, The City of New York, in respect of any legal action or proceeding arising out of or in relation to the indenture and the debt securities and will agree that all claims in respect of such legal action or proceeding may be heard and determined in such New York state or U.S. federal court and will waive, to the fullest extent permitted by law, the defense of an inconvenient forum to the maintenance of any such action or proceeding in any such court.

Information Concerning the Trustee

We may, from time to time, borrow from or maintain deposit accounts and conduct other banking transactions with the trustee and its affiliates in the ordinary course of business.

Under the indenture, the trustee is required to transmit annual reports to all holders regarding its eligibility and qualifications as trustee under the indenture and related matters.

DESCRIPTION OF THE RIGHTS TO PURCHASE ORDINARY SHARES OR PREFERENCE SHARES

The following summary sets forth certain terms and provisions of the rights we may issue to our shareholders to purchase from us our ordinary shares or our preference shares. The rights will be issued pursuant to a separate rights agreement to be entered into between us and a bank or trust company, as rights agent at the time of issuance.

General

The rights may be issued under the rights agreement independently or together with any other securities offered by a prospectus supplement. If rights are offered, the applicable prospectus supplement will describe the specific terms and provisions of the rights, which may differ from the terms described in this prospectus. To the extent that any particular terms of the rights described in a prospectus supplement differ from any of the terms described herein, then the terms described herein will be deemed to have been superseded by that prospectus supplement. We encourage you to read the applicable rights agreement, which we will file as an exhibit to, or incorporate by reference in, the registration statement of which this prospectus forms a part. The prospectus supplement will include the following terms, without limitations:

- the exercise price;
- the date of determining the shareholders entitled to the rights distribution;
- the rights agent;
- the aggregate number of ordinary shares or preference shares purchasable upon exercise of the rights;
- the aggregate number of rights issued;
- the date, if any, on and after which the rights will be separately transferable;
- the date on which the right to exercise the rights will commence, and the date on which the right will expire;
- the method by which holders of rights will be entitled to exercise;
- the conditions to the completion of the offering, if any;
- the withdrawal, termination and cancellation rights, if any;
- any applicable federal income tax considerations; and
- any other terms of the rights, including terms, procedures and limitations relating to the distribution, exchange and exercise of the rights.

Each right will entitle the holder of rights to purchase for cash the number of ordinary shares or preference shares at the exercise price provided in the applicable prospectus supplement. Rights may be exercised at any time up to the close of business on the expiration date for the rights provided in the applicable prospectus supplement.

Exercise of Rights

Holders may exercise rights as described in the applicable prospectus supplement. Upon receipt of payment and the rights certificate properly completed and duly executed at the corporate trust office of the rights agent or any other office indicated in the prospectus supplement, we will, as soon as practicable, forward the ordinary shares or preference shares, as applicable, purchasable upon exercise of the rights. If less than all of the rights issued in any rights offering are exercised, we may offer any unsubscribed securities directly to persons other than shareholders, to or through agents, underwriters or dealers or through a combination of such methods, including pursuant to standby arrangements, as described in the applicable prospectus supplement.

DESCRIPTION OF THE WARRANTS TO PURCHASE ORDINARY SHARES OR PREFERENCE SHARES

The following summary sets forth certain terms and provisions of the ordinary share warrants and preference share warrants. The warrants will be issued pursuant to a share warrant agreement between us and a share warrant agent to be selected at the time of issue.

General

The share warrants may be issued under the share warrant agreement independently or together with any other securities offered by a prospectus supplement. If share warrants are offered, the applicable prospectus supplement will describe the designation and the specific terms of the share warrants, which may differ from the terms described in this prospectus. To the extent that any particular terms of the warrants described in a prospectus supplement differ from any of the terms described herein, then the terms described herein will be deemed to have been superseded by that prospectus supplement. We encourage you to read the applicable warrant agreement, which we will file as an exhibit to, or incorporate by reference in, the registration statement of which this prospectus forms a part. The prospectus supplement will include the following terms, without limitations:

- the offering price, if any;
- the designation and terms of the ordinary shares or preference shares purchasable upon exercise of the share warrants;
- if applicable, the date on and after which the share warrants and the related offered securities will be separately transferable;
- the number of ordinary shares or preference shares purchasable upon exercise of one share warrant and the initial price at which shares may be purchased upon exercise of the share warrant;
- the date on which the right to exercise the share warrants shall commence and the date on which these rights shall expire;
- a discussion of the material U.S. federal income tax considerations;
- any call provisions;
- the currency in which the offering price, if any, and exercise price are payable;
- the antidilution provisions of the share warrants;
- the maximum or minimum number of warrants that may be exercised at any time;
- information with respect to book-entry procedures, if any; and
- any other terms of the share warrants.

The ordinary shares or preference shares issuable upon exercise of the share warrants will, when issued in accordance with the share warrant agreement, be fully paid and nonassessable. This means that the shares will be paid for in full at the time they are issued, and, once they are paid for in full, there will be no further liability for further assessments or taxation.

Exercise of Share Warrants

You may exercise your share warrants by surrendering to the share warrant agent your share warrant certificate with the form of election to purchase on the reverse of the certificate properly completed and executed by you, or your authorized agent, which signature must be guaranteed by a bank or trust company, by a broker or dealer which is a member of the Financial Industry Regulatory Authority, which we refer to in this prospectus as

Table of Contents

the FINRA, or by a member of a national securities exchange. You must indicate on the form of election whether you are electing to exercise all or a portion of the share warrants evidenced by the certificate. You must also submit a payment of the aggregate exercise price of the share warrants to be exercised in lawful money of the United States along with your share warrant certificates, unless otherwise set forth in the applicable prospectus supplement. Upon receipt of the share warrant certificate, form of election and aggregate payment, if applicable, by the share warrant agent, the share warrant agent will requisition from the transfer agent for the ordinary shares or the preference shares, as the case may be, a certificate representing the number of ordinary shares or preference shares purchased for issuance and delivery to you or upon your written order. If you exercise less than all of the share warrants evidenced by any share warrant certificate, the share warrant agent shall deliver to you a new share warrant certificate representing your unexercised share warrants.

Anti-dilution and Other Provisions

The exercise price payable, the number of ordinary shares or preference shares purchasable upon the exercise of each share warrant and the number of share warrants outstanding are subject to adjustment if specified events occur. These events include:

- the issuance of a stock dividend to holders of ordinary shares or preference shares; and
- a combination, subdivision or reclassification of ordinary shares or preference shares.

In lieu of adjusting the number of ordinary shares or preference shares purchasable upon exercise of each share warrant, we may elect to adjust the number of share warrants. No adjustment in the number of shares purchasable upon exercise of the share warrants will be required until cumulative adjustments require an adjustment of at least 1% in the number of shares purchasable. We may also, at our option, reduce the exercise price at any time. No fractional shares will be issued upon exercise of share warrants, but we will pay the cash value of any fractional shares otherwise issuable. Notwithstanding the preceding sentences, in case of any consolidation, merger, or sale or conveyance of our property as an entirety or substantially as an entirety, you, as a share warrant holder, shall have the right to the kind and amount of shares of stock and other securities and property, including cash, receivable by a holder of the number of ordinary shares or preference shares into which your share warrants were exercisable immediately prior to this event.

No Rights as Shareholders

You will not be entitled, by virtue of being a share warrant holder, to vote, to consent, to receive dividends, to receive notice as shareholders with respect to any meeting of shareholders for the election of our directors or any other matter, or to exercise any rights whatsoever as shareholders of our company.

DESCRIPTION OF THE WARRANTS TO PURCHASE DEBT SECURITIES

The following summary sets forth certain terms and provisions of the debt warrants. The debt warrants will be issued pursuant to a debt warrant agreement between us and a debt warrant agent to be selected at the time of issue.

The debt warrants may be issued under the debt warrant agreement independently or together with any other securities offered by a prospectus supplement. If debt warrants are offered, the applicable prospectus supplement will describe the designation and the specific terms of the debt warrants, which may differ from the terms described in this prospectus. To the extent that any particular terms of the warrants described in a prospectus supplement differ from any of the terms described herein, then the terms described herein will be deemed to have been superseded by that prospectus supplement. We encourage you to read the applicable warrant agreement, which we will file as an exhibit to, or incorporate by reference in, the registration statement of which this prospectus forms a part. The prospectus supplement will include the following terms, without limitations:

- the offering price, if any;
- the designation, aggregate principal amount and terms of our debt securities purchasable upon exercise of the debt warrants;
- if applicable, the date on and after which the debt warrants and the related offered securities will be separately transferable;
- the principal amount of our debt securities purchasable upon exercise of one debt warrant and the price at which the principal amount of our debt securities may be purchased upon exercise of the debt warrant;
- the date on which the right to exercise the debt warrants shall commence and the date on which this right shall expire;
- a discussion of the material U.S. federal income tax considerations;
- whether the warrants represented by the debt warrant certificates will be issued in registered or bearer form;
- the currency, currencies or currency units in which the offering price, if any, and exercise price are payable;
- the antidilution provisions of the debt warrants;
- the maximum or minimum number of warrants that may be exercised at any time;
- information with respect to book-entry procedures, if any; and
- any other terms of the debt warrants.

You, as a debt warrant holder, will generally not have any of the rights of holders of our debt securities, including the right to receive the payment of principal of, any premium or interest on, or any additional amounts with respect to, our debt securities or to enforce any of the covenants of our debt securities or the indenture.

Exercise of Debt Warrants

You may exercise your debt warrants by surrendering at the office of the debt warrant agent your debt warrant certificate with the form of election to purchase on the reverse side of the certificate properly completed and signed by you, which signature must be guaranteed by a bank or trust company, by a broker or dealer which is a member of the FINRA or by a member of a national securities exchange. You must also submit a payment in full of the exercise price, as set forth in the applicable prospectus supplement. Upon the exercise of debt warrants, we will issue the debt securities in authorized denominations in accordance with your instructions. If you exercise less than all of the debt warrants evidenced by your debt warrant certificate, a new debt warrant certificate will be issued for the remaining number of debt warrants.

DESCRIPTION OF UNITS

We may issue units consisting of combinations of any two or more of the other securities offered by this prospectus. The applicable prospectus supplement will describe the terms of the units and of the securities comprising the units, including whether and under what circumstances the securities comprising the units may be traded separately. You should read the particular terms of the documents pursuant to which the units will be issued, which will be described in more detail in the applicable prospectus supplement.

PLAN OF DISTRIBUTION

We may sell the offered securities in any one or more of the following ways from time to time:

- through agents;
- to or through underwriters;
- through dealers; or
- directly to purchasers.

The applicable prospectus supplement will set forth the specific terms of the offering of the offered securities, including:

- the terms of the offering, including the offering price;
- the name or names of any underwriters (including managing underwriters), dealers or agents;
- the purchase price of the offered securities and the net proceeds to us from the sale;
- any underwriting discounts, concessions, commissions or agency fees and other items constituting underwriters', dealers' or agents' compensation, which may be changed from time to time;
- any delayed delivery arrangements; and
- the offering expenses.

The distribution of the offered securities may be effected from time to time:

- in one or more transactions at a fixed price or prices, which may be changed;
- at market prices prevailing at the time of sale;
- at prices related to the prevailing market prices; or
- at negotiated prices.

Offers to purchase offered securities may be solicited by agents designated by us from time to time. Any agent involved in the offer or sale of the offered securities in respect of which this prospectus is delivered will be named, and any commissions payable by us to the agent will be set forth, in the applicable prospectus supplement. Any agent may be deemed to be an underwriter, as that term is defined in the Securities Act, of the offered securities so offered and sold.

If offered securities are sold to the public by means of an underwritten offering, either through underwriting syndicates represented by managing underwriters or directly by the managing underwriters, we will execute an underwriting agreement with an underwriter or underwriters, and the names of the specific managing underwriter or underwriters, as well as any other underwriters, will be set forth in the applicable prospectus supplement. In addition, the terms of the transaction, including commissions, discounts and any other compensation of the underwriters and dealers, if any, will be set forth in the applicable prospectus supplement, which prospectus supplement will be used by the underwriters to make resales of the offered securities. If underwriters are utilized in the sale of the offered securities, the offered securities will be acquired by the underwriters for their own account and may be resold from time to time in one or more transactions, including:

- negotiated transactions;
- at fixed public offering prices; or
- at varying prices determined by the underwriters at the time of sale.

Table of Contents

In addition, the underwriting agreement will provide that the obligations of the underwriters are subject to specified conditions precedent and that the underwriters with respect to a sale of offered securities will be obligated to purchase all of the offered securities of a series if any are purchased.

We may grant to the underwriters options to purchase additional offered securities to cover over-allotments, if any, at the public offering price, with additional underwriting discounts or commissions as may be set forth in the applicable prospectus supplement. If we grant any over-allotment option, the terms of the over-allotment option will be set forth in the applicable prospectus supplement.

If a dealer is utilized in the sales of offered securities, we will sell the offered securities to the dealer as principal. The dealer may then resell the offered securities to the public at varying prices to be determined by the dealer at the time of resale. Any dealer may be deemed to be an underwriter of the offered securities so offered and sold. The name of the dealer and the terms of the transaction will be set forth in the applicable prospectus supplement.

Offers to purchase offered securities may be solicited directly by us and the sale of the offered securities may be made by us directly to institutional investors or others with respect to any resale of the offered securities. The terms of any of these sales will be described in the applicable prospectus supplement.

Offered securities may also be offered and sold in connection with a remarketing upon their purchase, in accordance with a redemption or repayment pursuant to their terms, or otherwise by one or more remarketing firms acting as principals for their own accounts or as agents for us. Any remarketing firm will be identified and the terms of its agreements, if any, with us and its compensation will be described in the applicable prospectus supplement. Remarketing firms may be deemed to be underwriters in connection with the offered securities remarketed by them.

We may issue to our existing security holders, through a dividend or similar distribution, subscription rights to purchase our ordinary shares or preference shares, which may or may not be transferable. In any distribution of subscription rights to our existing security holders, if all of the underlying securities are not subscribed for, we may then sell the unsubscribed securities directly to third parties or may engage the services of one or more underwriters, dealers or agents, including standby underwriters, to sell the unsubscribed securities to third parties. The applicable prospectus supplement will describe the specific terms of any offering of our ordinary shares or preference shares through the issuance of subscription rights, including, if applicable, the material terms of any standby underwriting or purchase arrangement.

Agents, underwriters, dealers and remarketing firms may be entitled, under agreements entered into with us, to indemnification by us against some civil liabilities, including liabilities under the Securities Act that may arise from any untrue statement or alleged untrue statement of a material fact or any omission or alleged omission to state a material fact in this prospectus, any supplement or amendment hereto or any other offering material, in the registration statement of which this prospectus forms a part or in any of the documents incorporated by reference herein or therein, or to contribution with respect to payments which the agents, underwriters, dealers or remarketing firms may be required to make. The specific terms of any lock-up provisions, if any, in respect of any given offering will be described in the applicable prospectus supplement.

We may authorize underwriters or other persons acting as our agent to solicit offers by specified institutions to purchase offered securities from us, pursuant to contracts providing for payments and delivery on a future date, which will be set forth in the applicable prospectus supplement. Institutions with which these contracts may be made include commercial and savings banks, insurance companies, pension funds, investment companies, educational and charitable institutions and others. However, in all cases, these institutions must be approved by us. The obligations of any purchaser under any contract will be subject to the condition that the purchase of the offered securities shall not, at the time of delivery, be prohibited under the laws of the jurisdiction to which the purchaser is subject. The underwriters and other agents will not have any responsibility in respect of the validity or performance of these contracts.

Table of Contents

The offered securities may also be sold in one or more of the following transactions: (i) block transactions (which may involve crosses) in which a broker-dealer may sell all or a portion of such securities as agent, but may position and resell all or a portion of the block as principal to facilitate the transaction; (ii) a special offering, an exchange distribution or a secondary distribution in accordance with applicable Nasdaq or other stock exchange, quotation system or over-the-counter market rules; (iii) sales “at the market” to or through a market maker or into an existing trading market, on an exchange or otherwise, for such securities; and (iv) sales in other ways not involving market makers or established trading markets, including direct sales to purchasers.

Unless the applicable prospectus supplement states otherwise, each series of offered securities will be a new issue and, other than the ordinary shares, which are listed on the Nasdaq Global Market, will have no established trading market. We may elect to list any series of offered securities on an exchange and, in the case of the ordinary shares, on any additional exchange. However, unless otherwise specified in the applicable prospectus supplement, we shall not be obligated to do so. No assurance can be given as to the liquidity of the trading market for any of the offered securities.

Any underwriter may also engage in stabilizing transactions, syndicate covering transactions and penalty bids in accordance with Rule 104 of Regulation M under the Exchange Act. Stabilizing transactions involve bids to purchase the underlying security in the open market for the purpose of preventing or retarding a decline in the price of the securities. Syndicate covering transactions involve purchases of the securities in the open market after the distribution has been completed in order to cover syndicate short positions. Penalty bids permit the underwriters to reclaim a selling concession from a syndicate member when the securities originally sold by the syndicate member are purchased in a stabilizing or syndicate covering transaction to cover syndicate short positions.

Stabilizing transactions, syndicate covering transactions and penalty bids may have the effect of raising or maintaining the market price of our securities or preventing or retarding a decline in the market price of our securities. As a result, the price of the securities in the open market may be higher than it would otherwise be in the absence of these transactions. The underwriters may, if they commence these transactions, discontinue them at any time.

Concurrently with any offering of debt securities that are convertible into or exercisable or exchangeable for our ordinary shares, we may offer from time to time our ordinary shares by means of a separate prospectus supplement and accompanying prospectus. Our ordinary shares may be offered to the public in an offering by underwriters, dealers or agents. In addition, we may agree to loan ordinary shares to affiliates of such underwriters, dealers or agents, which affiliates we refer to as the “share borrowers,” pursuant to a share lending agreement to be described in the applicable prospectus supplement. Such share borrowers may use the borrowed shares to facilitate transactions by which investors in the notes may hedge their investments in such notes. In connection with facilitating those transactions, the share borrowers and their affiliates may receive customary, negotiated fees from investors.

In connection with any offering of debt securities that are convertible into or exercisable or exchangeable for our ordinary shares, we may enter into convertible debt security hedge transactions with affiliates of the underwriters. Such convertible debt security hedge transactions may reduce the potential dilution upon conversion of such debt securities. We may apply a portion of the net proceeds from the sale of such debt securities to pay the cost of such convertible debt security hedge transactions.

In connection with establishing an initial hedge of these transactions, the hedge counterparty or its affiliates may enter into various derivative transactions with respect to our ordinary shares, concurrently with or shortly after the pricing of such debt securities. These activities could have the effect of increasing or preventing a decline in the price of our ordinary shares concurrently with or shortly after the pricing of such debt securities.

In addition, the hedge counterparty or its affiliates will likely modify its hedge position following the pricing of such debt securities from time to time by entering into or unwinding various derivative transactions

and/or purchasing or selling our ordinary shares in secondary market transactions prior to the maturity of such debt securities (including during any settlement period in respect of any conversion of such debt securities). The effect, if any, of any of these transactions and activities on the market price of our ordinary shares or such debt securities will depend in part on market conditions and cannot be ascertained at this time, but any of these activities could impact the price of our ordinary shares and the value of such debt securities and, as a result, the value of the consideration and the number of shares, if any, that you would receive upon conversion of such debt securities and, under certain circumstances, your ability to convert such debt securities.

Underwriters, dealers, agents and remarketing firms may engage in transactions with, or perform services for, us and our subsidiaries or our affiliates in the ordinary course of business for which they receive customary compensation.

Unless otherwise indicated in the applicable prospectus supplement, certain legal matters with respect to the securities will be passed upon for the issuers by Clifford Chance US LLP, our U.S. counsel, and certain legal matters with respect to the securities under the laws of Jersey, Channel Islands will be passed upon for us by Carey Olsen Jersey LLP.
